## **Faceted Search Synthesis Lectures On Information Concepts Retrieval And S:**

Faceted Search Daniel Tunkelang, 2022-05-31 We live in an information age that requires us more than ever to represent access and use information Over the last several decades we have developed a modern science and technology for information retrieval relentlessly pursuing the vision of a memex that Vannevar Bush proposed in his seminal article As We May Think Faceted search plays a key role in this program Faceted search addresses weaknesses of conventional search approaches and has emerged as a foundation for interactive information retrieval User studies demonstrate that faceted search provides more effective information seeking support to users than best first search Indeed faceted search has become increasingly prevalent in online information access systems particularly for e commerce and site search In this lecture we explore the history theory and practice of faceted search Although we cannot hope to be exhaustive our aim is to provide sufficient depth and breadth to offer a useful resource to both researchers and practitioners Because faceted search is an area of interest to computer scientists information scientists interface designers and usability researchers we do not assume that the reader is a specialist in any of these fields Rather we offer a self contained treatment of the topic with an extensive bibliography for those who would like to pursue particular aspects in more depth Table of Contents I Key Concepts Introduction What Are Facets Information Retrieval Faceted Information Retrieval II Research and Practice Academic Research Commercial Applications III Practical Concerns Back End Concerns Front End Concerns Conclusion Glossary

Concept      **Publishing and Using Cultural Heritage Linked Data on the Semantic Web** Eero Hyvonen,2022-05-31  
Cultural Heritage CH data is syntactically and semantically heterogeneous multilingual semantically rich and highly  
interlinked It is produced in a distributed open fashion by museums libraries archives and media organizations as well as  
individual persons Managing publication of such richness and variety of content on the Web and at the same time supporting  
distributed interoperable content creation processes poses challenges where traditional publication approaches need to be re  
thought Application of the principles and technologies of Linked Data and the Semantic Web is a new promising approach to  
address these problems This development is leading to the creation of large national and international CH portals such as

Europeana to large open data repositories such as the Linked Open Data Cloud and massive publications of linked library data in the U S Europe and Asia Cultural Heritage has become one of the most successful application domains of Linked Data and Semantic Web technologies This book gives an overview on why when and how Linked Open Data and Semantic Web technologies can be employed in practice in publishing CH collections and other content on the Web The text first motivates and presents a general semantic portal model and publishing framework as a solution approach to distributed semantic content creation based on an ontology infrastructure On the Semantic Web such an infrastructure includes shared metadata models ontologies and logical reasoning and is supported by shared ontology and other Web services alleviating the use of the new technology and linked data in legacy cataloging systems The goal of all this is to provide layman users and researchers with new more intelligent and usable Web applications that can be utilized by other Web applications too via well defined Application Programming Interfaces API At the same time it is possible to provide publishing organizations with more cost efficient solutions for content creation and publication This book is targeted to computer scientists museum curators librarians archivists and other CH professionals interested in Linked Data and CH applications on the Semantic Web The text is focused on practice and applications making it suitable to students researchers and practitioners developing Web services and applications of CH as well as to CH managers willing to understand the technical issues and challenges involved in linked data publication Table of Contents Cultural Heritage on the Semantic Web Portal Model for Collaborative CH Publishing Requirements for Publishing Linked Data Metadata Schemas Domain Vocabularies and Ontologies Logic Rules for Cultural Heritage Cultural Content Creation Semantic Services for Human and Machine Users Conclusions
