Dealing with Dilemma P. T. Kelly, 2012-12-06 The aim of DEALING WITH DILEMMA is

to integrate medical and genetic information with the psychosocial aspects of genetic counseling in order to provide a working manual for genetic counselors. The book fills a gap in the genetic counseling field because it emphasizes the humanistic aspects of genetic counseling and is primarily concerned with communication between genetic counselor and counsellee. The few genetic counseling books available at this time are devoted almost entirely to the medical and genetic aspects of the subject. This book is written in nontechnical language but it presupposes some knowledge of Mendelian genetics, polygenic inheritance and chromosomal anomalies. No prior study of psychology or counseling is necessary; however, *DEALING WITH DILEMMA* is intended for physician and nonphysician genetic counselors, private practice physicians in pediatrics, obstetrics, family and general practice, internists, nurses, public health professionals, genetic counseling students, social workers and other health professionals. Much of the material presented should be useful to those who deal with the psychosocial ramifications of many nongenetic diseases as well as problems of the mentally retarded, handicapped or chronically ill. In addition, it is hoped that professionals who plan state and federal health policy can use this book to gain a better knowledge of the humanistic side of genetic counseling.

Microcomputers in Special Education Florence M. Taber, 1983

Genetic Counseling Dianne M. Bartels, Bonnie LeRoy, Arthur L. Caplan, 2010-01-01

At Home in the Netherlands uses a range of indicators to describe developments in the integration of non-Western migrants and their children in the Netherlands. Attention is focused on the situation of non-Western children in education, the position of non-Western migrants on the labour and housing markets, their representation in the crime figures and their degree of socio-cultural integration. The book also looks at civic integration, the mutual perceptions of the non-Western and indigenous populations and the life situation of young people with a non-Western background.
