

7. No parts, except those assembled with a "press fit," require unusual force during assembly. If you encounter difficulty in disassembling or assembling a part, determine the reason before proceeding. Be patient.

8. Cover all openings after removing parts or subassemblies to keep dirt, small tools and parts, etc., from falling in.

9. When assembling 2 parts, start all fasteners required, then tighten evenly.

10. If a part requires replacement, always take old parts to the dealer, when practical, for comparison to replacement part.

SAFETY HINTS

Professional mechanics can work for years and never sustain a serious injury. If you observe a few rules of common sense and safety, you can enjoy many safe hours servicing your own engine. You could hurt yourself or damage the motor if you ignore these rules.

1. Never use gasoline as a cleaning solvent.
2. Never smoke or use a torch in the vicinity of flammable liquids such as cleaning solvent in open containers.
3. Never smoke or use a torch in an area where batteries are being charged. Highly explosive hydrogen gas is formed during the charging process.
4. If welding or brazing is required on the engine, remove the fuel tank to a safe distance, at least 50 feet away. Welding on gas tanks requires special safety procedures and must be performed only by someone skilled in the process.
5. Use the proper sized wrenches to avoid damage to nuts and injury to yourself.
6. When loosening a tight or stuck nut, be guided by what would happen if the wrench should slip. Protect yourself accordingly.
7. Keep your work area clean and uncluttered.
8. Wear safety goggles during all operations involving drilling, grinding, or use of a cold chisel.
9. Never use worn tools.
10. Keep a fire extinguisher handy and be sure it is rated for gasoline and electrical fires.

TOOLS

Shop Tools

For proper servicing, you will need an assortment of ordinary handtools. As a minimum, these include:

- | | |
|-------------------------|-------------------------------|
| 1. Combination wrenches | 7. Phillips screwdrivers |
| 2. Sockets | 8. Slot (common) screwdrivers |
| 3. Plastic mallet | 9. Feeler gauges |
| 4. Small hammer | 10. Spark plug gauge |
| 5. Snap ring pliers | 11. Spark plug wrench |
| 6. Pliers | |

Special tools necessary are shown in the chapters covering the particular repair in which they are used.

Electrical system servicing requires a voltmeter, ohmmeter, or other device for determining continuity, and a hydrometer for battery equipped engines.

Advanced tune-up and troubleshooting procedures require a few more tools.

1. *Hydrometer (Figure 1)*. This instrument measures state of charge of the battery, and tells much about battery condition. Such an instrument is available at any auto parts store and through most larger mail order outlets. A satisfactory one costs less than \$3.
