Signal Processing for Passive Bistatic Radar Mateusz Malanowski, 2019-08-31 This cutting edge resource introduces the basic concepts of passive bistatic radar such as bistatic geometry bistatic radar equation and analysis of different illuminating signals These techniques although known for almost a century have not been developed intensively for decades mainly due to technical limitations but today the passive radar concept can be realized in practice and is of great interest for military and civilian users This book provides insight into understanding the potential and limitations of passive radar systems as well as the differences between signal processing in active and passive radar Each of the signal processing stages typically applied in passive radar is described including digital beamforming clutter removal target detection localization and tracking These concepts are illustrated with both simulated

and measured data along with examples of passive radar systems Correlation processing which is crucial for passive radar operation is presented as well as practical approaches for calculating the cross ambiguity function The problems of range and velocity cell migration are also introduced The book analyzes and compares different antenna array geometries to show readers the appropriate solution for a particular scenario of passive radar Cartesian tracking is also presented based on the extended Kalman filter Parallel and sequential updating approaches are introduced and compared These concepts are illustrated with both simulated and measured data along with examples of passive radar systems making this book useful for both novice and advanced practitioners Battlespace Technologies Richard S. Deakin, 2010 The era of mechanized warfare is rapidly giving way to the battle for information superiority OCo enabled by electronic technologies that provide data for detailed analysis of enemy forces and capabilities Supported with over 400 four color photographs and illustrations this new book is written and designed specifically to help non specialists quickly understand the complexities of Network Enabled Capability NEC It offers you expert guidance on how to achieve information dominance throughout the battlespace by effectively employing the technologies concepts and decision making processes of network enabled warfare Written in clear nontechnical language with minimum mathematics the book explains how to use sensor technologies including radar and electronic warfare systems to disseminate information to key decision makers in timely and relevant manner You learn how these technologies allow for the effective acquisition and dissemination of intelligence while denying the collection dissemination and use of intelligence by enemy forces Providing a complete understanding of the advantages and weaknesses of information warfare this practical book shows you what factors need to be taken into account when designing systems and equipment for use in a network enabled environment Moreover this forward looking reference explores what evolving requirements to consider for future air land and sea battlespace scenarios This is an extraordinarily valuable and useful resource for military staff defense industry engineers and managers and government officials involved with defense funding decisions *Review of Modern Engineering Solutions for the Industry* Zhen Yu Du, Bin Liu, 2012-10-26 Selected peer reviewed papers from the 2012 International Conference on Mechatronic Systems and Automation Systems MSAS 2012 July 21 2012 Wuhan China *Radar System Analysis and Modeling* David Knox Barton, 2005 Accompanying disc includes an evaluation version of Mathcad11 which will expire 120 days after installation *Signal Detection and Estimation* Mourad Barkat, 2005 This newly revised edition of a classic Artech House book provides you with a comprehensive and current understanding of signal detection and estimation Featuring a wealth of new and expanded material the second edition introduces the concepts of adaptive CFAR detection and distributed CA CFAR detection The book provides complete explanations of the mathematics you need to fully master the material including probability theory distributions and random processes **Sci-tech News** , 2005 **SASN '05** Vijay Atluri, 2005 EW 104: Electronic Warfare Against a New Generation of Threats David L.
