Avery, Beth Ann Gaede, 2007-11-19 In If

This Is the Way the World Works William O Avery and Beth Ann Gaede ask two primary questions First what principles from science are so broadly accepted that scientists themselves are willing to say This is the way the world works Second how do congregations and their leaders behave when they operate in concert with these seemingly universal principles Avery and Gaede explore five principles from the philosophy of science that suggest an alternative way to view congregational mission and leadership openness to new information complexity diversity interrelatedness and process Their premise is that when faith communities align themselves with the way the world God's world works they more faithfully carry out their vocations as witnesses to God's reconciling work and as servants to one another By following these basic scientific principles Avery and Gaede argue we arrive at a different view of leadership in the church If this is truly the way the world works leaders will find strength through relationships hope in diversity and above all trust in the love of God *God, Evolution, and Animal Suffering* Bethany N. Sollereder, 2018-10-29 After the publication of *On the Origin of Species* in 1859 theologians were faced with the dilemma of God creating through evolution Suddenly pain suffering untimely death and extinction appeared to be the very tools of creation and not a result of the sin of humanity Despite this paradigm shift the question of non human suffering has been largely overlooked within theodicy debates overwhelmed by the extreme human suffering of the twentieth century This book redresses this imbalance by offering a rigorous academic treatment of the questions surrounding God and the suffering of non human animals Combining theological philosophical and biblical perspectives this book explores the relationship between God and Creation within Christian theology First it dismantles the popular theological view that roots violence and suffering in the animal kingdom in the fall of humanity Then through an exploration of the nature of love it affirms that there are multiple reasons to suggest that God and creation can both be good even with the presence of violence and suffering This is an innovative exploration of an under examined subject that encompasses issues of theology science morality and human animal interactions As such it will be of keen interest to scholars and academics of religion and science the philosophy of religion theodicy and biblical studies **The Prism and the Rainbow** Joel W. Martin, 2010-06-01 God or Darwin It is one of the most contentious conflicts of our time It is also completely unnecessary according to Joel W Martin an evolutionary biologist and ordained elder in the Presbyterian Church USA In this slim but powerful book Martin argues that it is not contradictory to be a practicing faithful Christian who accepts the science of evolution Martin finds that much of the controversy in the United States over evolution is manufactured and predicated on a complete and sometimes willful misapprehension of basic science Science and religion he says serve different purposes and each seeks to answer questions that the other need never address He believes that many of the polarizing debates about evolution distract from the deeper lessons of Christianity and that literal fundamentalist readings of the Bible require the faithful to reject not just evolution but many of science's greatest discoveries Just as the scientific explanation of rainbows is not meant to refute the biblical rainbow story of God's promise evolutionary theory is not a ploy to disavow the divine Indeed Martin shows that the majority

of Christians worldwide accept the theory of evolution He urges his fellow Christians to refuse to participate in the intellectually stifling debate over evolution and creationism intelligent design      **Creation's Diversity** Willem Drees, Hubert Meisinger, Taede Smedes, 2008-05-01 This collection of substantial essays explores the question of how to relate environmental engagement in the context of religious convictions In the first part of the book A Diversity of Visions of Creation six essays address various views of creation In the second part of the book Sustaining Creation s Diversity the concept of sustainability is analyzed critically given the dynamic character of natural reality as unveiled by the sciences This is followed by some reflections on ethical and theological considerations regarding the idea that we ought to sustain diversity

**A Religious Journal of the School of Theology** ,2004      Intelligent Design Robert B. Stewart, 2007 Leading intellectuals debate and explain the controversy over Intelligent Design in this text that explores the scientific religious and philosophical facets of the debate in a balanced fair and open minded format      Perspectives on Science and Christian Faith ,2007      **Science's Blind Spot** Cornelius G. **Zygon** ,2007      Public Theology in an Age of World Christianity Paul S. Chung, 2010-04-15 This book aims to rearticulate and reinterpret a Christian concept of God s mission and evangelization in light of the universal irregular and transversal horizon of God s narrative as it pertains to the realities of public sphere Paul Chung maintains that mission serves the Word of God which is revealed in Jesus Christ by the power of the Holy Spirit for all It is salient to develop a theology of Trinitarian mission through the perspective of God s living word event in a hermeneutical intercultural fashion Here a Trinitarian concept of missio Dei is deepened and refurbished in light of God as the Subject of speaking through Israel the church and the face of innocent victims and religious outsiders This perspective contextualizes and widens the mission of God s narrative and deepens its universality in light of the word event      **Heythrop Journal** ,2004      Opening Up a Closed World Botond Gaál, 2007      Darwin and Intelligent Design Francisco José Ayala, 2006 In this short but illuminating piece world renowned biologist Francisco Ayala addresses the notion of intelligent design the notion that individual species are too complex to have developed through evolution and therefore must be the work of an intelligent designer God      Book Review Index ,2006 Every 3rd issue is a quarterly cumulation
