Dealing with Darwin David N. Livingstone, 2014-05-15 How was Darwin's work discussed and debated among the same religious denomination in different locations Using place politics and rhetoric as analytical tools historical geographer David N Livingstone investigates how religious communities sharing a Scots Presbyterian heritage engaged with Darwin and Darwinism at the turn of the twentieth century His findings presented as the prestigious Gifford Lectures transform our understandings of the relationship between science and religion The particulars of place whether in Edinburgh Belfast Toronto Princeton or Columbia South Carolina shaped the response to Darwin's theories Were they tolerated repudiated or welcomed Livingstone shows how Darwin was read in different ways with meaning distilled from Darwin's texts depending on readers own histories their literary genealogies and cultural preoccupations That the theory of evolution fared differently in different places Livingstone writes is exactly what Darwin might have predicted As the theory diffused it diverged *Dealing with Darwin* shows the profound extent to which theological debates about evolution were rooted in such matters as anxieties over control of education the politics of race relations the nature of local scientific traditions and challenges to traditional cultural identity In some settings conciliation with the new theory even endorsement was possible demonstrating that attending to the specific nature of individual communities subverts an inclination to assume a single relationship between science and religion in general evolution and Christianity in particular Livingstone concludes with contemporary examples to remind us that what scientists can say and what others can hear in different venues differ today just as much as they did in the past **Religious Pamphlets** , 1876 *The War That Never Was* Kenneth W. Kemp, 2020-05-29 One of the prevailing myths of modern intellectual and cultural history is that there has been a long running war between science and religion particularly over evolution This book argues that what is mistaken as a war between science and religion is actually a pair of wars between other belligerents one between evolutionists and anti evolutionists and another between atheists and Christians In neither of those wars can one align science with one side and religion or theology with the other This book includes a review of the encounter of Christian theology with the pre Darwinian rise of historical geology an account of the origins of the warfare myth and a careful discussion of the salient historical events on which the myth makers rely the Huxley Wilberforce exchange the Scopes Trial and the larger anti evolutionist campaign in which it was embedded and the more
