Danby,Marilyn Fleer,Christina Davidson,Maria Hatzigianni,2018-04-03 This book highlights the multiple ways that digital
technologies are being used in everyday contexts at home and school in communities and across diverse activities from play
to web searching to talking to family members who are far away The book helps readers understand the diverse practices
employed as children make connections with digital technologies in their everyday experiences In addition the book employs
a framework that helps readers easily access major themes at a glance and also showcases the diversity of ideas and
theorisations that underpin the respective chapters In this way each chapter stands alone in making a specific contribution
and at the same time makes explicit its connections to the broader themes of digital technologies in children s everyday lives
The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their
families and reflects the various contexts in which children engage such as preschools and childcare centres *General*

in Motion Juilee Decker,2024-08-06 This book explores the histories and functions of museums while also looking at the
current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines
the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums
science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums
in the United States with some historical framing beyond the U S Section II explores the primary functions of museums
including conservation exhibition interpretation engagement and service Section III examines museums from within by
exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and
equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change
rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all
along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex
by deeply considering where museums have come from where they are today and where they are going Entirely new to this
edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or
museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and

their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible
