At the beginning of the twenty first century the vocabulary of civility and civilization is very much at the forefront of political debate Most of these debates proceed as if the meaning of these words were self evident This is where Civilizing Emotions intervenes tracing the history of the concepts of civility and civilization and thus adding a level of self reflexivity to the present debates Unlike previous histories Civilizing Emotions takes a global perspective highlighting the roles of civility and civilization in the creation of a new and hierarchized global order in the era of high imperialism and its entanglements with the developments in a number of well chosen European and Asian countries Emotions were at the core of the practices linked to the creation of a new global order in the nineteenth century Civilizing Emotions explores why and how emotions were an asset in civilizing peoples and societies their control and management but also their creation and their ascription to different societies and social groups The study is a contribution to the history of emotions to global history and to the history of concepts three rapidly developing and innovative research areas which are here being brought together for the first time

**Writing the History of Emotions** Ute Frevert, 2024-03-21  
Emotions make history and they have a history They influence historical events such as revolutions riots and protest movements At the same time they are shaped by historical experiences tied to family upbringing educational and cultural institutions work and the home Writing the History of Emotions shows how emotions like love trust honour pride shame empathy and greed have impacted historical change since the 18th century and were themselves dependent on social political and economic environments Importantly this book provides a timely exploration of racialized gendered class based notions of emotions This exciting addition to Bloomsbury's successful Writing History series analyses how emotions matter in and to history and how they are themselves objects of history Here leading scholar Ute Frevert eschews a traditional chronological history of emotions in favour of an innovative collection which transgresses time periods to illustrate the different emotional meanings one particular material object has had throughout history This book sheds light on how emotions have been used instrumentalised and manipulated both to propel and suspend democratic politics In doing so it opens a rich new avenue of research for the history of emotions

**Emotional Lexicons** Ute Frevert, Christian Bailey, Pascal Eitler, Benno Gammerl, Bettina Hitzer, Margrit Pernau, Monique Scheer, Anne Schmidt, Nina Verheyen, 2014-02-13  
Emotions are as old as

humankind But what do we know about them and what importance do we assign to them Emotional Lexicons is the first cultural history of terms of emotion found in German French and English language encyclopaedias since the late seventeenth century Insofar as these reference works formulated normative concepts they documented shifts in the way the educated middle classes were taught to conceptualise emotion by a literary medium targeted specifically to them As well as providing a record of changing language use and the surrounding debates many encyclopaedia articles went further than simply providing basic knowledge they also presented a moral vision to their readers and guidelines for behaviour Implicitly or explicitly they participated in fundamental discussions on human nature Are emotions in the mind or in the body Can we read another person's feelings in their face Do animals have feelings Are men less emotional than women Are there differences between the emotions of children and adults Can emotions be civilised Can they make us sick Do groups feel together Do our emotions connect us with others or create distance The answers to these questions are historically contingent showing that emotional knowledge was and still is closely linked to the social cultural and political structures of modern societies Emotional Lexicons analyses European discourses in science as well as in broader society about affects passions sentiments and emotions It does not presume to refine our understanding of what emotions actually are but rather to present the spectrum of knowledge about emotion embodied in concepts whose meanings shift through time in order to enrich our own concept of emotion and to lend nuances to the interdisciplinary conversation about them
