Case 4.4: Lost Interest in Life

<https://dsm.psychiatryonline.org/doi/full/10.1176/appi.books.9781585624836.ch04#x78756.8297212>

- 51-year-old woman Barbara Reiss
 - o Reported depression every day for most of the day
 - o Lost weight without dieting, trouble falling asleep almost every night and woke up in the middle of the night a lot
 - o Diminished energy, concentration, and ability to do her administrative job at a dog food processing plant.
 - Convinced that she had made a mistake that would lead to the deaths of thousands of dogs. She expected that she would soon be arrested, and would rather kill herself than go to prison.
- Diagnosis: Major depressive disorder (MDD)
 - o Ms. Reiss has exhibited all nine of the symptomatic criteria for major depression: depressed mood, loss of interest or pleasure, weight loss, insomnia, psychomotor agitation, loss of energy, excessive guilt, trouble concentrating, and thoughts of death.
 - o Only five are necessary for a major depression diagnosis.

Case 9.1: Pain and Depression

- Michelle, 51-year-old former hairdresser
- Woman with shaggy silver hair and dark sunglasses, seated in a wheelchair, who offered a limp handshake and a plaintive sigh before asking the psychiatrist if he would mind pushing her wheelchair into his office.
- Stated that she had been suffering from back pain for the last 13 months
 - o Accidentally fractured her pelvis, coccyx, right elbow, and three ribs when climbing a fire escape
 - o Accident seemed to change her—underwent several months of physical therapy
 - o Daily narcotic medication was only moderately helpful.
 - o Seen “a dozen” doctors in various specialties and tried multiple treatments, including anesthetic injections and bioelectric stimulation therapy.
 - Still did not help with the pain
- Smoked marijuana daily, explaining that a joint enjoyed in hourly puffs softened her pain and helped her to relax.
- She did not drink alcohol or use other illicit drugs.
- Before the accident, Michelle had a steady job and worked at the salon more than 20 years with huge popularity
 - o Her colleagues= “my real family”—has not been back to work since accident due to pain, despite doctors say that it is alright
- Diagnosis: Major depression
 - o Cannabis use disorder
 - o Somatic symptom disorder (With predominant pain, persistent, moderate to severe)
 - excessive thoughts, feelings, and behaviors related to her pain and physical debility

Personalized Precision Medicine in Autism Spectrum Related Disorders Lidia V. Gabis,Josephine Barbaro,Raz Gross,2022-02-15

Banished G. Cledwyn Jenkins,2020-08-01 Banished is dedicated to sex offender research and its issues regarding society mental health and the law equally It focuses on this problem in cultural legal and scientific terms specifically from the clinical point of view though it is written for the general public It offers an up to date and all inclusive look into the mind and habits of the pedophile and child molester This book offers current research into one of the most controversial subjects in society to date discussing topics of mental illness and various psychological disorders the law and how this problem is legally dealt with It focuses on this problem in cultural legal and scientific terms that are readily comprehensible both from the clinical standpoint and the layman s point of view The book offers a detailed review of the sex offender the pedophile and the child molester and directly explores his thinking processes reasoning and related issues that offer a clear and concise expos in these most hated people In addition to covering the adult offender this work also exemplifies the thought processes of child and adolescent offenders in order to offer cues for parents and educators of possible abuse or illicit behavior Through direct examples of client art case histories and offender testimonies the book s purpose will surely educate as well as in purposing methods for positive change in the process The research and findings are based on a journalistic foundation as well as from an experiential point of view where the author had worked with and had interviewed the subjects exemplified in the case studies section directly One could view this book as a documentary in text form to that of a simple scientific assessment or expos Some examples such as statistical data and related state and government laws national and international legal information as well as properly devised case study examples are utilized to

help illustrate the intent of the book's overall purpose. Moreover, because there are sections regarding internet deviancy and its major influence on the human psyche and that these sections offer raw information, the reader should be aware of the content and the reasoning for using it. It is done so to educate and to hopefully illustrate the realities of this global problem. In addition to a selection of thoroughly researched interviews with said offenders in the form of case studies reminiscent to the current style of the American Psychological Association (APA) format, I also highlight a selection of documented artwork specifically by children and young adults while working as a therapist in various hospitals. This section may serve as an alert for parents and educators for possible cues of sexual abuse in or outside of the home but such will also illustrate the sheer potency sexual abuse can cause upon its victims and how it will be viewed from their unconscious psyche and conscious viewpoints.

Charney and Nestler's Neurobiology of Mental Illness Dennis Charney, Eric Nestler, Joseph D. Buxbaum, Elisabeth B. Binder, Joshua A. Gordon, Marina R. Picciotto, 2025-01-03. The genetic investigation into mental illnesses has progressed rapidly since the mapping of the human genome. Driven by advances in genomic profiling technology, massive genomic datasets are powering the discovery of genetic variation associated to complex traits including mental illness. From severe neurodevelopmental disorders to schizophrenia and depression, genetic variation plays some role in risk. Critically, most mental illnesses are complex, multifactorial, and the consequence of a combination of genetic and environmental influences. This chapter will introduce the genome, its variation, and the methods used to identify what variants and genes matter for mental illnesses.

Casebook for DSM-5 ®, Second Edition Jayna Bonfini, Jayna E. Bonfini, 2021-06-19. Distinguished by its use of real-world case examples to help students link DSM-5 criteria with client symptoms, this practical casebook for graduate-level programs in mental health masterfully demonstrates how to put the DSM-5 into practice. It is designed to help students understand why a particular diagnosis is given based on the individual client's specific background and personal history. This book is distinguished from other casebooks through the presentation of complex real-life case studies that discuss pairing the DSM-5 criteria with symptomatology and offers in-depth analyses of treatment interventions and client management. Each case is consistently formatted to include an overview of the client, symptoms, problems, diagnosis, and treatment interventions, including components, applications, and results/prognosis. Readers will have an opportunity to formulate their own reactions and diagnostic impressions for each case before the commentary reveals the correct conclusion. An ideal text to enhance courses in psychopathology and diagnosis as well as practicum and internship, the casebook will diversify and broaden the classroom experience by enlightening students with compelling clinical cases that have been experienced by practicing professionals. The second edition has been expanded to feature additional cases for each category, a more detailed table of contents to better organize the book around disorder categories, additional discussion questions for each case, as well as a final review chapter, making this text a helpful supplement to a variety of undergraduate and graduate courses. By fully exploring the rationale behind diagnostic criteria, the book provides trainees in counseling
