*Higher Education, Stratification, and Workforce Development* Sheila Slaughter,Barrett Jay Taylor,2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases *Unequal Higher Education* Barrett J. Taylor,Brendan Cantwell,2019-05-03 American higher education is often understood as a vehicle for social advancement However the institutions at which students enroll differ widely from one another Some enjoy tremendous endowment savings and or collect resources via research which then offsets the funds that students contribute Other institutions rely heavily on student tuition payments These schools may struggle to remain solvent and their students often bear the lion s share of educational costs *Unequal Higher Education* identifies and explains the sources of stratification that differentiate colleges and universities in the United States Barrett J Taylor and Brendan Cantwell use quantitative analysis to map the contours of this system They then explain the mechanisms that sustain it and illustrate the ways in which rising institutional inequality has limited individual opportunity especially for students of color and low income individuals

**How to be an Academic Superhero** Iain Hay,2017-10-27 In universities across the world academics struggle to establish and sustain their careers while satisfying intensifying institutional demands Drawing from the author s decades of observation and experience in academia this exceptional book responds to the challenges of fostering and sustaining a successful academic career

*What Work Means* Claudia Strauss, 2024-06-15 *What Work Means* goes beyond the stereotypes and captures the diverse ways Americans view work as a part of a good life Dispelling the notion of Americans as obsessive workaholics Claudia Strauss presents a more nuanced perspective While some live to work others prefer a diligent 9 to 5 work ethic that is conscientious but preserves time for other interests Her participants often enjoyed their jobs without making work the focus of their life These findings challenge laborist views of waged work as central to a good life as well as post work theories that treat work solely as exploitative and soul crushing Drawing upon the evocative stories of unemployed Americans from a wide range of occupations from day laborers to corporate managers both immigrant and native born Strauss explores how diverse Americans think about the place of work in a good life gendered meanings of breadwinning accepting financial support from family friends and the state and what the ever elusive American dream means to them By considering how unemployment experiences diverge from joblessness earlier *What Work Means* paves the way for a historically and culturally informed discussion of work meanings in a future of teleworking greater automation and increasing nonstandard employment

**The WEIRDest People in the World** Joseph Henrich, 2020-09-08 A New York Times Notable Book of 2020 A Bloomberg Best Non Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior Evolution Society Must Read Popular Evolution Book of 2020 A bold epic account of how the co evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world Perhaps you are WEIRD raised in a society that is Western Educated Industrialized Rich and Democratic If so you re rather psychologically peculiar Unlike much of the world today and most people who have ever lived WEIRD people are highly individualistic self obsessed control oriented nonconformist and analytical They focus on themselves their attributes accomplishments and aspirations over their relationships and social roles How did WEIRD populations become so psychologically distinct What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries In *The WEIRDest People in the World* Joseph Henrich draws on cutting edge research in anthropology psychology economics and evolutionary biology to explore these questions and more He illuminates the origins and evolution of family structures marriage and religion and the profound impact these cultural transformations had on human psychology Mapping these shifts through ancient history and late antiquity Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under

pressure from the Roman Catholic Church It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets occupational specialization and free competition laying the foundation for the modern world Provocative and engaging in both its broad scope and its surprising details The WEIRDest People in the World explores how culture institutions and psychology shape one another and explains what this means for both our most personal sense of who we are as individuals and also the large scale social political and economic forces that drive human history Includes black and white illustrations Workforce Development and Higher Education: A Strategic Role for Institutional Research

Richard A. Voorhees,2005 In a global economy higher education increasingly is being asked to address workforce development needs This is a relatively new agenda for institutional research but one that can play directly to the skills that many institutional researchers possess and those that can be quickly developed This volume of New Directions for Institutional Research assembles both the conceptual underpinnings of workforce development from an international perspective and provides practical information that can provide a foundation for institutional researchers to become more deeply engaged with their institutions in this critical area This volume includes institutional case studies as well as specific techniques for gauging the market potential for new instructional programs It concludes with a compilation of suggested projects and studies that institutional research personnel might consider on behalf of their campuses **Higher Education**

**and Social Stratification** Torsten HUSEN,1987 **Annual Report of the President of the Australian Industrial Relations Commission** Australian Industrial Relations Commission,2000 **Leveraging Multigenerational Workforce Strategies in Higher Education** Edna Chun,Alvin Evans,2021-04-14 The higher education literature on workplace diversity has overlooked the development of multigenerational workforce strategies as a key component of an inclusive talent proposition While race gender sexual orientation disability and other demographic attributes have gained considerable attention in diversity strategic planning scant research pertains to building inclusive multigenerational approaches within the culture and practices of higher education Now more than ever there is an urgent and unmet need to identify actionable strategies and approaches that optimize the contributions of multigenerational talent across the faculty administrator and staff ranks With the goal of enhancing workforce capacity and creating more inclusive workplaces Leveraging Multigenerational Workforce Strategies in Higher Education offers an in depth look at multigenerational strategies that enhance institutional capacity and respond to educational needs This book is the first to address the creation of multigenerational strategies in the higher education workplace based upon substantial empirical studies and qualitative research Drawing on in depth interviews with faculty and administrators the book examines the broad framing of generations that consists of stereotypes narratives images and emotions Through the lens of these narratives it describes how ageist framing is magnified by other minoritized statuses including race ethnicity gender and sexual orientation and can result in structural inequality process based discrimination and asymmetrical behavioral interactions in the higher education

workplace A major feature of the book is its focus on best in class HR and diversity policies and strategies that institutional leaders can deploy to overcome generational and ageist barriers and build an inclusive culture that values the contributions of all members Due to its practical and concrete emphasis in sharing leading edge policies and practices that comprise a holistic multigenerational workforce strategy the book will serve as a concrete resource to boards of trustees presidents provosts deans diversity officers department chairs faculty academic and non academic administrators diversity and human resource leaders and diversity taskforces in their efforts to create strategic evidence based multigenerational workforce approaches In addition the book will be utilized in upper division and graduate courses in higher education administration diversity human resource management educational leadership intergenerational issues gerontology social work and organizational psychology      *Stratification in Higher Education* ,2007      Beyond the Skills Gap Matthew T.

Hora,2019-01-02 2018 Frederic W Ness Book Award AAC U How can educators ensure that young people who attain a postsecondary credential are adequately prepared for the future Matthew T Hora and his colleagues explain that the answer is not simply that students need more specialized technical training to meet narrowly defined employment opportunities Beyond the Skills Gap challenges this conception of the skills gap highlighting instead the value of broader twenty first century skills in postsecondary education They advocate for a system in which employers share responsibility along with the education sector to serve the collective needs of the economy society and students Drawing on interviews with educators in two and four year institutions and employers in the manufacturing and biotechnology sectors the authors demonstrate the critical importance of habits of mind such as problem solving teamwork and communication They go on to show how faculty and program administrators can create active learning experiences that develop students skills across a range of domains The book includes in depth descriptions of eight educators whose classrooms exemplify the effort to blend technical learning with the cultivation of twenty first century habits of mind The study set in Wisconsin takes place against the backdrop of heated political debates over the role of public higher education This thoughtful and nuanced account enriched by keen observations of postsecondary instructional practice promises to contribute new insights to the rich literature on workforce development and to provide valuable guidance for postsecondary faculty and administrators      *Higher Education and Social Stratification* Torsten Husén,1987 The social stratification process is analyzed from a theoretical point of view with assumptions tested with empirical evidence from the International Institute for Educational Planning project in developing countries or with information obtained through the researcher s prior studies on industrialized countries The significant and often negative consequences due to the problem of social stratification are discussed in relation to the educational and occupational careers of educated youth The subject is introduced by noting linkage between education and employment egalitarian policies in education and a historical perspective Egalitarian philosophies in education are considered along with aspects of the equality problem relevant to developing countries The role of formal education as a social stratifier is explored

A comparative perspective on education and social stratification in developing countries as well as differences between developed and developing countries with regard to social stratification are offered. Information is included on university graduates in developing countries focused on social background and social destination. Among the conclusions are social stratification in all societies is enhanced by competition selectivity and a meritocratic reward system because institutions of higher education in developing countries serve subsistence economies with a limited modern sector. Their post primary enrollment patterns have no historical parallel in the developed economies and home background in third world countries tends to have less impact on access, survival and outcomes of secondary and higher education than in industrialized countries. This is the first in a series of Business Higher Education Forum BHEF playbooks intended to assist companies, higher education institutions, private philanthropies, membership associations, professional societies, government agencies and other stakeholders seeking to understand the potential value of investing in coordinated strategic long term partnerships to increase the persistence of undergraduate students, particularly women and minorities, toward degree attainment and entering the 21st century workplace. BHEF has compiled a set of tools and materials that enables business and higher education to move from transactional engagement that is limited to low touch piecemeal activities such as on campus recruiting or research related to business products and services that are often disconnected from undergraduate education to strategic and long term partnerships to align undergraduate education with workforce needs. From project launch through implementation, BHEF has developed metrics and processes for planning, launching and assessing the projects, partnerships and scaling strategies. This playbook details current regional projects underway in areas such as data science and analytics, cybersecurity, water and energy sciences, materials sciences and engineering and it offers best practices for creating and launching other successful collaborative projects. The following are appended: 1. Examples of Business Needs Assessments and Supply Analyses and 2. Regional Project Summaries.
