how it relates to modern IR **The Unilateralist Temptation in American Foreign Policy** David Skidmore, 2011-03-21
 The pattern of multilateral engagement and unilateral retrenchment in American foreign policy from the Cold War through the Clinton Bush and Obama years presents a puzzle What accounts for the unilateralist turn Is it a passing aberration attributable to the neoconservative ideology of the Bush administration What then of the disengagement evident earlier during Clinton's presidency or its continuation under Obama Was the U S investment in multilateral institutions following World War II an anomaly Or is the more recent retreat from international institutions the irregularity Skidmore traces U S unilateralism to the structural effects of the end of the Cold War both domestically and abroad to argue that the United States was more hegemonic than multilateralist a rule maker not a rule taker An institutional bargain existed under the Cold War threat from the Soviets but absent those imperatives the United States has been less willing to provide collective goods through strong international institutions and other states are less willing to defer to U S exemptions On the home front the post Cold War political environment has made it more difficult for presidents to resist the appeals of powerful interests who are threatened by multilateral commitments This book demonstrates that American unilateralism has deeper roots and more resilience than many expect The unilateral temptation can only be overcome through new political bargains domestically and internationally that permit multilateral engagement even the absence of great power rivalry The European Union and Regional Integration in East Africa Harrison Kalunga Mwilima, 2023-08-23 This book examines European countries engagement in promoting regional integration in the East African Community EAC In addition to their usage of the European Union EU states employ other bilateral initiatives to channel their regional aid to the EAC The book explores differing national interests and the decisions to engage with the EAC both multilaterally via the EU and through their other bilateral channels In addition to analysing states interests the book goes further to examine how lack of coordination of those European initiatives creates various challenges in the EAC It is shown how EAC bureaucrats have to engage separately with the EU and its member states in their different channels thus experiencing challenges in different stages of their aid project cycles for instance in the identification implementation and reporting phases This book will be an excellent resource for researchers and practitioners focusing on the topics of European promotion of regional integration development aid African and European regional integration processes as well as foreign policy analysis **The New Walford** Ray Lester, 2005
 Covers 15 broad subject groupings social sciences generic psychology sociology social work politics government law finance accountancy industries business education sport media information and tools for information professionals **International Relations and World Politics** Paul R. Viotti, Mark V. Kauppi, 2009 International Relations and World Politics introduces the issues in an organized and comprehensible way examining them in relation to two trends three broad organizing themes or concepts key actors and three basic images or perspectives that provide structure for the pages that follow Two trends increasing globalization and crises of authority that characterize international relations and world politics Key organizing
