Judicial Bricolage Tania Groppi, Marie-Claire Ponthoreau, Irene Spigno, 2025-02-06 This book represents a unique contribution to comparative legal studies by presenting the results of an empirical research project on the use of foreign precedents in constitutional interpretation in 31 jurisdictions worldwide. It expands and updates the outcomes presented in the previous successful book *The Use of Foreign Precedents by Constitutional Judges* edited by Tania Groppi and Marie-Claire Ponthoreau and published in 2013 as Volume 1 of the series *Hart Studies in Comparative Public Law*. This new research covering countries from all the continents with special attention to some of the emerging jurisdictions of the Global South confirms that the practice of making explicit use of foreign precedents is still limited both quantitatively and qualitatively. Judicial dialogue only exists in common law jurisdictions and even there judicial bricolage is much more common than judicial comparativism. Since the previous edition this practice has gone hand in hand with new developments in constitutional law such as the democratic erosion and backsliding, the emergence of populist movements, the increasing role of regional human rights courts which in many cases overshadowed foreign sources and the end of a global vision of constitutionalism. Applying a quantitative and a qualitative analysis with the support of tables and data, the book gives a more complete picture of the practice of citing foreign precedents in this new and challenging era, resulting in essential reading for comparative and constitutional legal scholars.

Migration as Economic Imperialism Immanuel Ness, 2023-05-25 For several decades, wealthy states, international development agencies, and multinational corporations have encouraged labour migration from the Global South to the Global North. As well as providing essential workers to support the transformation of advanced economies, the remittances that migrants send home have been touted as the most promising means of national development for poor and undeveloped countries. As Immanuel Ness argues in this sharp corrective to conventional wisdom, temporary labour migration represents the most recent form of economic imperialism and global domination. A closer look at the economic and social evidence demonstrates that remittances deepen economic exploitation, unravel societal stability, and significantly expand economic inequality between poor and rich societies. The book exposes the damaging political, economic, and social effects of migration on origin countries in Africa, Asia, and Latin America and how border and security mechanisms control and marginalize low-wage migrant workers, especially women and youth. Ness asserts that remittances do not bring growth to poor countries but extend national dependence on the export of migrant workers, leading to warped and unequal development on the global periphery. This expert take will be a valuable resource for students and scholars of migration and development across the social sciences.
