La investigación e "imputación policial" en los delitos contra los recursos naturales y el medio ambiente Pedro Fernández Sánchez, 2010-12-06 La presente publicación se ocupa desde una perspectiva investigadora policial de los delitos regulados por los artículos 325 a 331 del Código Penal español. No obstante la práctica totalidad del libro se centra en el tipo básico del delito ecológico tradicional regulado en el artículo 325 CP. En sus páginas se puede observar cómo la práctica policial debe adaptarse a las corrientes jurisprudenciales para desarrollar un trabajo de calidad trabajo que se inicia con los denominados atestados especializados confeccionados bajo las órdenes de los fiscales provinciales delegados en Medio Ambiente para poder llevar a cabo con el ánimo de problemas procesales posible la imputación policial de los presuntos autores de estas conductas penales y su posterior enjuiciamiento. También se explican los distintos procesos de investigación que se pueden dar en este tipo de delitos lo que nos lleva a adentrarnos en las diferentes técnicas de investigación de que se pueden servir los diferentes cuerpos policiales ya sean estatales autonómicos o locales. Como resultado de todo ello se detalla la confección y tramitación de un atestado especializado tipo en esta materia que puede servir de guía sobre todo a las policías menos experimentadas en las investigaciones ambientales **Water,**

Tratamiento jurídico de la contaminación acústica urbana Montero Ruiz, María Teresa, 2024-02-12. Este libro tiene por objeto contribuir al análisis de la contaminación acústica en las ciudades. Esta forma de contaminación medioambiental puede afectar gravemente a la salud de las personas sin que terminemos de ser realmente conscientes de ello. Así pues, confrontaremos dos realidades: la social y la jurídica, y analizaremos el papel del Derecho en la protección de los bienes jurídicos afectados. Además, el surgimiento de un modelo de ocio predominantemente nocturno, aunque suponga un pequeño porcentaje de los problemas de la contaminación sonora en las ciudades, está provocando graves problemas de salud a los residentes como consecuencia de la falta de descanso, siendo en este sector donde se constata una mayor desidia por parte de los ayuntamientos. En el plano dogmático se han suscitado controversias a la hora de instrumentar una adecuada protección penal del medio ambiente en general y de la contaminación acústica en particular. Lo cierto es que la vis atractiva del Derecho penal está olvidando cada vez más su *ultima ratio* ante la inoperancia administrativa, lo que de alguna manera rompe la racionalidad del ordenamiento jurídico que determina que si el Derecho administrativo no proporciona una respuesta idónea, la solución es que cambie en su legalidad y busque la eficacia, no que intervenga el Derecho penal. Por su contenido, esta monografía puede resultar de interés tanto en el ámbito académico como en el ámbito del ejercicio del Derecho si se desea profundizar en el conocimiento y posibilidades de las opciones jurídicas que batallan contra el ruido.

La protección de la biodiversidad. Estudio jurídico de los sistemas para la salvaguarda de las especies naturales y sus ecosistemas Juan-Cruz Alli Turrillas, 2016-07-20. La biodiversidad entendida como el conjunto de elementos vivos que forman la variedad natural de la tierra y que por lo tanto conforma su riqueza biológica se ha convertido en el principal parámetro de evaluación medioambiental.
