Koop, Klaus-Peter Schmolke, 2014-02-10 The warships of the World War II era German Navy are among the most popular subject in naval history with an almost uncountable number of books devoted to them. However, for a concise but authoritative summary of the design history and careers of the major surface ships, it is difficult to beat a series of six volumes written by Gerhard Koop and illustrated by Klaus Peter Schmolke. Each contains an account of the development of a particular class, a detailed description of the ships with full technical details and an outline of their service, heavily illustrated with plans, battle maps, and a substantial collection of photographs. These have been out of print for ten years or more and are now much sought after by enthusiasts and collectors, so this new modestly priced reprint of the series will be widely welcomed. The first volume appropriately is devoted to the Kriegsmarine's largest and most powerful units, the battleships Bismarck and Tirpitz, whose careers stand in stark contrast to each other – one with a glorious but short life while the other was to spend a hunted existence in Norwegian fjords all the time posing a threat to Allied sea communications while attacked by everything from midget submarines to heavy bombers.

**Tirpitz** Niklas Zetterling, 2009-12-01 The Germans, for their part, had learned not to pit their super battleships against the strength of the entire Home Fleet outside the range of protecting aircraft. Thus they kept Tirpitz hidden within fjords along the Norwegian coast like a Damocles Sword hanging over the Allies' maritime jugular, forcing the British to assume the offensive. This strategy paid dividends in July 1942 when the Tirpitz merely stirred from its berth, compelling the Royal Navy to abandon a Murmansk-bound convoy called PQ 17 in order to confront the leviathan. The convoy was then ripped apart by the Luftwaffe and U-boats while the Tirpitz returned to its fjord. In 1943 the British launched a flotilla of midget submarines against the Tirpitz, losing all six of the subs while only lightly damaging the battleship. Aircraft attacked repeatedly from carriers and both British and Soviet bases, suffering losses including an escort carrier while proving unable to completely knock out the mighty warship. Trying an indirect approach, the British launched one of the war's most daring commando raids at St Nazaire in order to knock out the last drydock in Europe capable of servicing the Tirpitz. Of over 600 commandos and sailors in the raid, more than half were lost during an all-night battle that succeeded at least in knocking out the drydock. It was not until November 1944 that the Tirpitz finally succumbed to British aircraft armed with 10,000 lb Tallboy bombs; the ship capsized at last with the loss of 1,000 sailors.

**Battleship Tirpitz** Vincent O'Hara, 2021-11-15 Building upon the expertise of the authors and historians of the Naval Institute Press, the Naval History Special Editions are designed to offer studies of the key vessels, battles, and events of armed conflict. Using an image-heavy magazine style format, these Special Editions should appeal to scholars, enthusiasts, and general readers alike. In 1939 the battleship was the queen of the seas. Battleships were designed to project power. They were the biggest and most powerful ships afloat and the yardsticks by which the world judged naval strength. Within this context, the German battleship Tirpitz, sister ship of Bismarck, was one of the most effective instruments of naval power ever deployed. The British called her The Beast. She spent the greater part of the Second World War tucked away in isolated fjords north of the Arctic Circle where

she became known as The Lonely Queen of the North She sortied only three times and never fired her guns at an enemy warship Yet against this menace the British exerted unequalled effort At all times they kept a pair of modern battleships standing by to face her should she sail they built mini submarines that could operate in the waters of the fjords they repeatedly massed aircraft carrier strike forces in futile efforts to knock her from the war At last they invented massive ordnance the Tallboy bomb the largest non nuclear explosive device of the war Sending their heaviest bombers against her and after three years of sustained effort the Beast was sunk The remarkable career of this remarkable ship is the subject of this authoritative and heavily illustrated Special Edition It considers Tirpitz s design her construction her historical context and all of her operations The power of this individual ship and the influence she exerted on the entire course of the war makes for an enlightening demonstration of the sometimes very unexpected way sea power can be expressed

**Battleship** Siegfried Breyer,1990-03-01 This small format book gives a detailed account of the battleship Tirpitz

*Tirpitz* Jonathan Sutherland,Diane Canwell,2011 The photos in this book are taken from an unpublished album belonged to a member of the crew of famous German Battleship Tirpitz It is a little known fact that before the start of World War Two the ship went on a shakedown voyage into the Atlantic traveling north into Arctic waters and south into the more tropical climates of the Caribbean There are superb photos of the officers and crew both above and below decks including some unique shots of the crew during their stint on a magnificent sail training vessel Other stunning shots show the vessels mighty weapons during gunnery practice during her sea trials This unique collection gives a close up view of one of the most powerful ships of World War Two a ship that proved to be a persistent thorn in the side of the Royal Navy until sunk in Norway towards the end of the war

**The German Battleship Tirpitz** Stefan Dramiński,2017-03-19 The last battleship of the German Kriegsmarine was ceremonially launched on 1 April 1939 After the failure of the operation Rheinbung and sinking of the battleship Bismarck during an Atlantic rally May 1941 Hitler banned planning such operations A decision to send Tirpitz to Norway was made There she could be stationed in fiords relatively safely and raid Allied shipping in Arctic waters Her presence in that region alone caused every convoy sailing nearby to be escorted by heavy warships The greatest success in the career of Tirpitz albeit achieved without firing even a single salvo was the operation against the convoy PQ 17 in July 1942 The ships heading for Murmansk were detected and the battleship with her escorts steamed out to attack the convoy It led to a controversial order issued by the British Admiralty to avoid a concentrated attack it was ordered to disperse the convoy Each ship was to reach the Soviet port on her own The result was a true massacre unprotected ships easily fell victim to bombs and torpedoes from German aircraft and U Boats The last offensive operation in the battleship s career took place in early September 1943 Tirpitz supported the landing on Spitsbergen with her artillery fire After the disaster of the convoy PQ 17 the British were determined to eliminate Tirpitz and sought the best ways to sink or damage the battleship Until the end of her career she was almost constantly harassed by air

and sea attacks One of the most successful attacks took place in late September 1943 Tirpitz was heavily damaged by X craft midget submarines carrying explosive charges Repairs lasted until Spring 1944 During several next months the battleship was attacked by carrier based aircraft and damaged several times The final blows were struck by land based four engined aircraft armed with 5 5 ton bombs In the first raid on 15 September 1944 Tirpitz sustained heavy damage The end of the battleship took place on 12 November when the ship following another attack capsized and sank in shallow waters of the fjord All pictures in this publication show the battleship in the configuration of July 1942
