*Colonialism and Foreign Ownership of Capital (Routledge Revivals)* Bharat Hazari, 2015-12-22 First published in 1982 Foreign control of capital is a major problem for many developing countries and can lead to the exercise of a form of colonial control whereby capital is provided for political rather than economic reasons This book discusses the implications of this phenomenon for trade theory and the amount of pressure that foreign countries can exert The opening chapter examines the themes of de industrialisation of stagnation after an initial spurt in economic activity and the premise that inflows of capital do not necessarily generate growth and expansion These initial discussions are developed in the subsequent chapters where the effects of foreign ownership on the host country's economy and trade are dealt with fully This work would be of interest to students of economics and development

Hazari, 1982      *European Investment in Greece in the Nineteenth Century* Korinna Schönhärl, 2020-09-23 Banking historiography often does not sufficiently take into account bankers deliberations of their decision making but rather limits investigation to considerations of profit maximisation This book shows that the decision making processes of nineteenth century bankers contemplating high risk financial markets like Greece are just as complex as present day investment decisions The book now published in English after a first German edition offers in depth studies of decision making in concrete historical situations considering political and economic circumstances and also the individual background of the actors concerned including a reflection on the influence of cultural movements such as Philhellenism Employing methodological inspirations from the field of behavioural finance the book analyses a broad range of published and unpublished English French Greek German and Swiss sources on European investment in Greece between 1821 and the Balkan wars Additionally rich insights into Greek economic history the economic integration of the country into Europe and long lasting European stereotypes of Southern Europe and Greece are provided this furthers understanding of the historical background of the Greek financial crisis after 2009 In combining the perspectives of financial economic political and cultural history this book is primarily significant for students of various fields of historiography Due to its strong awareness of methodological questions it is also of great interest to academic historians In addition the strong public interest in the Greek financial crisis after 2009 and its consequences for Europe will thirdly attract the interest of a broader public The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 International license

[Rethinking Statehood in Palestine](#) Leila H. Farsakh, 2021-10-26 The quest for an inclusive and independent state has been at the center of the Palestinian national struggle for a very long time This book critically reexamines this quest by exploring the meaning of Palestinian statehood and the challenges that face alternative models to it today *Rethinking Statehood in Palestine* gives prominence to a

young set of diverse Palestinian scholars both men and women to show how notions of citizenship sovereignty and nationhood are being currently rethought within the broader context of decolonization Bringing forth critical and multifaceted engagements with what Palestinian self determination entails within a larger regional context this groundbreaking book sets the terms of debate for the future of Palestine beyond partition *India after Naxalbari* Bernard D'Mello,2018-07-23 How the 1967 uprising at Naxalbari inspired a generation of resistance across India and the South Asian subcontinent Although the 1967 revolutionary armed peasant uprising in Naxalbari at the foot of the Indian Himalayas was brutally crushed the insurgency gained new life elsewhere in India In fact this revolt has turned out to be the world s longest running people s war and Naxalbari has come to stand for the road to revolution in India What has gone into the making of this protracted Maoist resistance Bernard D Mello s fascinating narrative answers this question by tracing the circumstances that gave rise to India s 1968 decade of revolutionary humanism and those that led to the triumph of the 1989 era of appallingly unequal growth condoned by Hindutva nationalism the Indian variant of Nazism Will what remain of India s continuing 1968 bring twenty first century New Democracy to the collective agenda Or will the ongoing regression of 1989 lead the way to full blown semi fascism and sub imperialism India after Naxalbari is far more than a simple history of the ongoing Naxalite Maoist resistance it is a deeply passionate and informed work that not only captures the essence of modern Indian history but also tries to comprehend the present in the context of that history so that the oppressed can exercise their power to influence its shape and outcome **SouthSouth Trade and Finance in the Twenty-First Century** Omar Dahi,Firat Demir,2016-10-10 This book is a contribution to the international trade and economic development literature and is based on a decade of joint research and collaboration on South South economic relations Given the increasing focus on the economic power of some developing countries for example the 2013 Human Development Report s Rise of the South it is particularly appropriate and timely NP The book s findings are based on rigorous empirical examination of South South trade and finance and it provides an even handed assessment from the perspective of long term development goals rather than mainstream welfare approaches or ideological theoretical worldview NP This work directly engages with the new developmentalism literature that has challenged the neoliberal orthodoxy and its policy approach which focuses on liberalization privatization and deregulation It also engages with literature by examining whether the increase in South South trade facilitates or inhibits the possibilities for developmentalist economic policy in developing countries The book shows concrete and positive results from South South trade particularly related to industrial development and also documents how South South trade is dominated by large developing countries and that South South trade liberalization may be counterproductive **Financing Roma Inclusion with European Structural Funds** Joanna Kostka,2018-11-19 This book provides an analysis of the highly politicized field of Roma inclusion and addresses the controversies surrounding the effectiveness of funding initiatives derived from European Cohesion Policy It confronts the widely held notion that European

**Capital and Colonialism** Klas Rönnbäck, Oskar Broberg, 2019-07-11 This book engages in the long standing debate on the relationship between capitalism and colonialism Specifically Rönnbäck and Broberg study the interaction between imperialist policies colonial institutions and financial markets Their primary method of analysis is examining micro and macro level data relating to a large sample of ventures operating in Africa and traded on the London Stock Exchange between 1869 and 1969 Their study shows that the relationship between capital and colonialism was highly complex While return from investing in African colonies on average was not extraordinary there were certainly many occasions when investors enjoyed high return due to various forms of exploitation While there were actors with rational calculations and deliberate strategies there was also an important element of chance in determining the return on investment not least in the mining sector which overall was the most important business for investment in African ventures during this period This book finally also demonstrates that the different paths of decolonization in Africa had very diverse effects for investors

*The Economics of Empire* Maureen E. Ruprecht Fadem, Michael O'Sullivan, 2020-12-30 The Economics of Empire Genealogies of Capital and the Colonial Encounter is a multidisciplinary intervention into postcolonial theory that constructs and theorizes a political economy of empire This comprehensive collection traces the financial genealogies associated with the colonial enterprise the strategies of economic precarity the pedigrees of capital and the narratives of exploitation that underlay and determined the course of modern history One of the first attempts to take this approach in postcolonial studies the book seeks to sketch the commensal relation a symbiotic phoresy between capitalism and colonialism reading them as linked structures that carried and sustained each other through and across the modern era The scholars represented here are all postcolonial critics working in a range of disciplines including Political Science Sociology History Peace and Conflict Studies Legal Studies and Literary Criticism exploring the connections between empire and capital and the historical and political implications of that structural hinge

Each author engages existing postcolonial and poststructuralist theory and criticism while bridging it over to research and analytic lenses less frequently engaged by postcolonial critics. In so doing they devise novel intersectional and interdisciplinary frameworks through which to produce more greatly nuanced understandings of imperialism, capitalism and their inextricable relation: new postcolonial critiques of empire for the twenty-first century. This book will be an excellent resource for students and researchers of Postcolonial Studies, Literature, History, Sociology, Economics, Political Science and International Studies among others.

**Theories of Imperialism (Routledge Revivals)** Norman Etherington, 2014-07-11. First published in 1984, this study examines closely the shifting attitudes towards and theories concerning imperialism from the colonial wars of the late nineteenth century to America's involvement in Vietnam. This lucid investigation encompasses the World Wars, the disintegration of the Colonies and the Cold War. It also gives fascinating insight into the theories of imperialism advocated by such diverse writers as Hobson, Wilshire, Angell, Brailsford, Luxemburg and Lenin. Throughout the author objectively evaluates the theory that capitalism is a cause of aggression, a fundamental tenet of anti-imperialist writers. It is Norman Etherington's contention that further investigations into the sources, causes and effects of imperialism can only take place if the various theories concerning it are analysed. A fascinating and detailed study, this reissue will be of particular value to students interested in the theories and history of imperialism.

**Imperialism Without Colonies** Harry Magdoff, 2003-04-09. In the decades after 1945, as colonial possessions became independent states, it was widely believed that imperialism as a historical phenomenon was coming to an end. The six essays collected in this volume demonstrate that a new form of imperialism was in fact taking shape: imperialism defined not by colonial rule but by the global capitalist market. From the outset, the dominant power in this imperialism without colonies was the United States. Magdoff's essays explain how this imperialism works, why it generates ever greater inequality, repression and militarism, and the essential role it plays in the development of U.S. capitalism. Written in the 1960s and 70s, Magdoff's essays constituted a major contribution to Marxist theory and provided a model of rigorous argument in which theory is constantly checked against the economic reality. They provide an indispensable guide to the basic forces at work in the global politics of the twenty-first century.

**Systemic Violence of the Law** Enrique Prieto-Rios, 2021-08-19. This book argues that International Investment Law system (IIL) was the result of a colonial project within a capitalist system that has been influenced by the developmentalism discourse and the neoliberal ideology, becoming an instrument that facilitated forms of systemic violence against Third World countries. In order to

develop this argument Enrique Prieto Rios uses post war critical thought chiefly Fanon as interpreted by Lewis R Gordon the works pursued by academics part of the Caribbean Philosophical Association the Institute for Global Law and Policy the international law from below southern perspectives and critical economic thought particularly the notable economic contributions of Ha Joon Chang and Latin American philosopher Enrique Dussel      **Post Colonial Theory and the Specter of Capital** ,2013      *Foreign Ownership and the Theory of Trade and Welfare* Richard A.
