Curriculum Development for Medical Education Patricia A. Thomas, David E. Kern, Mark T. Hughes, Sean A. Tackett, Belinda Y. Chen, 2022-08-30 A thoroughly revised and updated fourth edition of a text that has become an international standard for curriculum development in health professional education. Intended for faculty and other content experts who have an interest or responsibility as educators in their discipline, *Curriculum Development for Medical Education* has extended its vision to better serve a diverse professional and international audience. Building on the time honored practical and user friendly approach of the six step model of curriculum development, this edition is richly detailed with numerous examples of innovations that challenge traditional teaching models. In addition, the fourth edition presents updates in our understanding of how humans learn, a new chapter on curricula that addresses community needs and health equity, and an increased emphasis throughout on health systems science, population health, equity, educational technology in health professions education, and interprofessional education. This new edition remains a cutting edge tool and practical guidebook for faculty members and administrators responsible for the educational experiences of health professional students, residents, fellows, and practitioners. It includes chapters on each of the steps of curriculum development with updated examples and questions to guide the application of the timeless principles. Subsequent chapters cover curriculum maintenance and enhancement, dissemination, and curriculum development for larger programs. Appendixes present examples of full curricula designed using the six step approach, which is widely recognized as the current standard for publication and dissemination of new curricula, and provides a basis for meaningful educational interventions, scholarship, and career advancement for the health professional educator. The book also provides curricular faculty development and funding resources. Contributors: Chadia N. Abrams, Belinda Y. Chen, Heidi L. Gullett, Mark T. Hughes, David E. Kern, Brenessa M. Lindeman, Pamela A. Lipsett, Mary L. O'Connor, Leppert, Amit K. Pahwa, Deanna Saylor, Mamta K. Singh, Sean A. Tackett, Patricia A. Thomas. *Curriculum Development for Medical Education* David E. Kern, 1998 At a time when society is demanding accountability from the medical education system and residency review committees are demanding written curricula, this book offers a practical yet theoretically sound approach to curriculum development in medicine. Short, practical, and generic in its approach, the book begins with an overview of a six step approach to curriculum development. Each succeeding chapter then covers one of the six steps: problem identification, targeted needs assessment, goals and objectives, education methods, implementation, and evaluation. Additional chapters address curriculum maintenance, enhancement, and dissemination. Throughout, examples are used to illustrate major points. An appendix provides the reader with a selected list of published and unpublished resources on funding faculty development and already developed curricula. *Curriculum Development for Medical Education* Patricia A. Thomas, David E. Kern, Mark T. Hughes, Belinda Y. Chen, 2016-01-29 The third edition of this invaluable text reflects significant changes driving curriculum development and renewal throughout medical education. Based on a proven six step

model and including examples and questions to guide application of those timeless principles Curriculum Development for Medical Education is a practical guidebook for all faculty members and administrators responsible for the educational experiences of medical students residents fellows and clinical practitioners Incorporating revisions driven by calls for reform and innovations in medical education that challenge established teaching models the third edition includes an awareness of new accreditation standards and regulatory guidelines The authors have expanded their discussion of survey methodology for needs assessment and stress the importance of writing competency based goals and objectives that incorporate milestones entrustable professional activities and observable practice activities With updated examples focusing on interprofessional education collaborative practice and educational technology they describe educational strategies that incorporate the new science of learning A completely new chapter presents the unique challenges of curriculum development for large long and integrated curricula

Best Practices in Online Education David L. Kok, David Seignior, Michelle Barrett, 2025-05-26 The demand for online health professional educational programs has grown rapidly in recent years driven by technological advances and an increasing learner appetite for flexible accessible educational experiences As the uptake of online techniques has increased so has the research into their pedagogical underpinnings However the speed of these developments means many health professional educators remain unfamiliar with the evidence base and practicalities of actually designing and delivering these learning experiences This book summarizes best practices in online education in a succinct curated and practical manner It is designed with the busy health professional educator in mind and is written by fellow health professional educators who understand the everyday challenges of the role It highlights core principles gives step by step guidance on how to implement these for clinical learners and includes copious tips and tricks to facilitate success Covering everything from basic online

implementations through to the advanced integration of Artificial Intelligence into learning programs this book will serve as a valuable resource for any educator wanting to familiarise themselves with this important new discipline Annals of the Academy of Medicine, Singapore Academy of Medicine (Singapore),2008 *Medical Education: Developing A Curriculum For Practice* Fish, Della, Coles, Colin, 2005-11-01 This book is written by two eminent educators and clinicians in medicine and provides a wealth of information and food for thought for those who have responsibility for curriculum development Journal of Orthodontics What are the contemporary problems facing curriculum designers and developers What are the key questions that ought to be addressed with regard to curriculum design for medical practice How might a curriculum for practice in medical education be developed Medical Education offers a detailed response to these questions and shows what form a curriculum for practice should take and how one can be developed These ideas are presented in a highly practical and readable account that is essential reading for those involved in educating the doctors of the future and for policy makers in the field of medical education It also offers useful advice for those in related fields of health care The authors show that recent developments of curricula for postgraduate doctors have been founded on the misguided view promoted by politicians and policy makers that medical practice is routine straightforward and able to be reduced to simple protocols that professionals must learn and follow In this view doctors are technicians who need merely to be trained through a simple curriculum In contrast this book shows that the practice of medicine as experienced by working doctors is complex uncertain and unpredictable This requires a curriculum that provides the opportunity to learn to exercise professional judgement and make decisions based on practical wisdom **The Software Encyclopedia 2000** Bowker Editorial Staff, 2000-05 *Education World* ,2004 *Nature* Sir Norman Lockyer, 2008 **WIPO Magazine** ,2005 **Clearing** ,2003 *Current Index to Journals in Education* ,1985 Archives of Ibadan Medicine ,2005 **Competency-Based Curriculum Development in Medical Education** ,1978 *GI News* ,2003-04 **The Scientist** ,1998-07 **ISTC Today** ,1999
