

The background of the cover is a photograph of a large flock of birds, possibly terns or gulls, in flight over a body of water. The water is dark blue-grey with white, frothy waves breaking in the foreground. The birds are scattered across the upper half of the image, some in sharp focus and others blurred, suggesting movement. The overall tone is somewhat somber but hopeful, reflecting the book's title.

Ecology, Ethics and Hope Andrew T. Brei, 2015-11-30 Ecology Ethics and Hope explores what hope is how it operates and whether or not it is important in our response to ecological challenges like climate change deforestation biodiversity loss and pollution The book offers an accessible and timely overview of this emerging topic within environmental ethics a platform for further discussion and refinement of the notion of hope Hope has started to receive more theoretical attention from philosophers and social scientists In light of worsening ecological conditions the concept of hope may offer motivation for us to change our destructive ways and conserve the ecosystem goods and systems we depend on The authors in this collection take stock of the various accounts of what hope is or is not what it does or does not and how relevant it is to ecological thinking The book covers topics including the psychology of hope how it might operate and change minds hope as a motivator of positive action and hope's essence in the context of a virtue or obligation focused morality Contributors Elizabeth Andre Assistant Professor of Outdoor Education Northland College USA Jonathan Beever Postdoctoral Scholar Rock Ethics Institute Penn State University USA Andrew T Brei Visiting Assistant Professor of Philosophy St Mary's University Andrew Fiala Professor of Philosophy California State University Fresno USA Trevor Hedberg Graduate Student University of Tennessee Knoxville USA Lisa Kretz Assistant Professor of Philosophy University of Evansville USA Michael Nelson Professor of Environmental Ethics and Philosophy Oregon State University USA John Nolt Professor of Philosophy University of Tennessee Knoxville USA Brian Treanor Professor of Philosophy Loyola Marymount University USA

Thinking Like a Planet J. Baird Callicott, 2013 Bringing together ecology evolutionary moral psychology and environmental ethics J Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh more optimistic approach Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm in Stephen Gardiner's words Callicott refuses to accept this view Instead he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past Callicott supports this theory by exploring and enhancing Aldo Leopold's faint sketch of an Earth ethic in Some Fundamentals of Conservation in the Southwest a seldom studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength

Environmental Ethics Marion Hourdequin, 2024-01-25 What is environmental virtue Is developing good habits enough What does climate justice require Is ecological restoration just another form of the human domination of nature Exploring these questions and more this book provides an up to date and balanced introduction to environmental ethics It first examines ethical theory then ties theory to practice showing how values guide environmental policies but also how policies and institutions shape environmental values Updated and expanded to engage with the latest scholarship scientific

findings and societal challenges this 2nd edition features New sections on food ethics multispecies justice intergenerational ethics and the Anthropocene Contemporary case studies focusing on the rights of nature the use of biotechnology in ecological restoration and just climate transitions Expanded coverage of diverse philosophical traditions including Confucian Daoist and Indigenous ethical perspectives Updated discussion questions further reading sections and online resources Exploring the possibilities and limitations inherent in both classical ethical models and modern theoretical approaches to the environment this is a key resource for teaching students to think ethically about the world we live in

Placing Nature on the Borders of Religion, Philosophy and Ethics Forrest Clingerman, Mark H. Dixon, 2016-04-22 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

[A New Environmental Ethics](#) Holmes Rolston III, 2020-04-28 This Second Edition of *A New Environmental Ethics: The Next Millennium for Life on Earth* offers clear powerful and often moving thoughts from Holmes Rolston III one of the first and most respected philosophers to write on the environment and often called the father of environmental ethics Rolston surveys the full spectrum of approaches in the field of environmental ethics and offers critical assessments of contemporary academic accounts He draws on a lifetime of research and experience to suggest an outlook and even hope for the future This forward looking analysis focused on the new millennium will be a necessary complement to any balanced textbook or anthology in environmental ethics The First Edition guaranteed to put you in your place Beyond that the Second Edition asks whether you want to live a de-natured life on a de-natured planet Key Updates in the Second Edition Covers the worsening environmental situation due to actions of the Trump administration including withdrawal from the Paris Agreement and from the U N Framework Convention on Climate Change Includes information on legislation in key U S states e.g. California and New York aimed to ameliorate the damage done at the federal level Increases coverage of group

knowledge group agreement and disagreement and group action in collective environmental ethics as distinguished from individual knowledge and action Examines the deleterious effects of online consumer behavior Explains how a loss of solidarity among a nation s citizens and even a larger solidarity among humanity leads to environmental degradation Offers new analysis of the effects of epistemic bubbles echo chambers and fake news on the behavior of voters and consumers Provides an extended critique of the Anthropocene Epoch and the prospect of geo engineering Earth to become a synthetic environment Environmental Ethics, Ecological Theology, and Natural Selection Lisa H. Sideris,2003 Lisa Sideris proposes a new way of thinking about the natural world an environmental ethic that incorporates the ideas of natural selection and values the processes rather than the products of nature Such an approach encourages us to take a minimally interventionist approach to nature Only when the competitive realities of evolution are faced squarely Sideris argues can we generate practical environmental principles to deal with such issues as species extinction and the relationship between suffering and sentience Ecology, Ethics, and the Future of Humanity Adam Riggio,2015-08-18 A book that combines moral and political philosophy with traditions of activism and literature in a background of scientific knowledge and interpretation to build a comprehensive picture of an ecological humanity *A New Environmental Ethics* Holmes Rolston, III,2020 This Second Edition of *A New Environmental Ethics The Next Millennium for Life on Earth* offers clear powerful and often moving thoughts from Holmes Rolston III one of the first and most respected philosophers to write on the environment and often called the father of environmental ethics Rolston surveys the full spectrum of approaches in the field of environmental ethics and offers critical assessments of contemporary academic accounts He draws on a lifetime of research and experience to suggest an outlook and even hope for the future This forward looking analysis focused on the new millennium will be a necessary complement to any balanced textbook or anthology in environmental ethics The First Edition guaranteed to put you in your place Beyond that the Second Edition asks whether you want to live a de natured life on a de natured planet Key Updates in the Second Edition Covers the worsening environmental situation due to actions of the Trump administration including withdrawal from the Paris accord and from the U N Framework Convention on Climate Change Includes information on legislation in key U S states e g California and New York aimed to ameliorate the damage done at the Federal level Increases coverage of group knowledge group agreement and disagreement and group action in collective environmental ethics as distinguished from individual knowledge and action Examines the deleterious effects of online consumer behavior Explains how a loss of solidarity among a nation s citizens and even a larger solidarity among humanity leads to environmental degradation Offers new analysis of the effects of epistemic bubbles echo chambers and fake news on the behavior of voters and consumers Provides an extended critique of the Anthropocene Epoch and the prospect of geo engineering Earth to become a synthetic environment **Environmental Ethics and Uncertainty** Whitney Bauman,Kevin O'Brien,2019-08-06 This book offers a multidisciplinary environmental approach to ethics in response to the contemporary

challenge of climate change caused by globalized economics and consumption This book synthesizes the incredible complexity of the problem and the necessity of action in response highlighting the unambiguous problem facing humanity in the 21st century but arguing that it is essential to develop an ethics housed in ambiguity in response Environmental Ethics and Uncertainty is divided into theoretical and applied chapters with the theoretical sections engaging in dialogue with scholars from a variety of disciplines while the applied chapters offer insight from 20th century activists who demonstrate and or illuminate the theory including Martin Luther King Rachel Carson and Frank Lloyd Wright This book is written for scholars and students in the interdisciplinary field of environmental studies and the environmental humanities and will appeal to courses in religion philosophy ethics politics and social theory Restored to Earth Gretel Van Wieren, 2013-07-09 Ecological restoration integrates the science and art of repairing ecosystems damaged by human activities Despite relatively little attention from environmental ethicists restoration projects continue to gain significance drawing on citizen volunteers and large amounts of public funds providing an important model of responding to ecological crisis Projects range from the massive multi billion dollar Kissimmee River project restoring 25 000 acres of Everglades wetlands to the 30 million effort to restore selected wetlands in industrial Brownfield sites in Chicago s south side Lake Calumet area to the reintroduction of tall grass prairie ecosystems in various communities in the Midwest Restored to Earth provides the first comprehensive examination of the religious and ethical dimensions and significance of contemporary restoration practice an ethical framework that advances the field of environmental ethics in a more positive action oriented experience based direction Van Wieren brings together insights and examples from restoration ecology environmental ethics religious studies and conservation and Christian thought as well as her own personal experiences in ecological restoration to propose a new restoration ethic grounded in the concrete hands on experience of humans working as partners with the land *The Rights of Nature* Roderick Nash, 1989 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader *Earth Community Earth Ethics* Larry L. Rasmussen, 1996 In this important new book social ethicist Larry Rasmussen lays the foundations for an approach to faith and ethics appropriate to a community of the earth in all its peril and promise Earth Community Earth Ethics is a comprehensive treatment that synthesizes insights from religion ethics and environmentalism in a single vision for creating a

sustainable community Earth Community Earth Ethics is arranged in three parts In the first Rasmussen scans our global situation and brings into relief the extraordinary range of dangers threatening all life on our planet In part two he explores worlds of religion ethics and human symbolism to glean from them the resources for a necessary conversion to earth Finally he sketches a constructive ethic that can guide us out of our present situation While its principle focus is environmental ethics Earth Community Earth Ethics builds on the foundations of international discussions of sustainable development and such books as The Ecology of Commerce and Envisioning a Sustainable Society Rasmussen shows how the environmental predicament underscores a variety of crises afflicting modern industrial society in economics in politics in gender and reproductive relations as well as the debates on the very meaning of life itself *Earthbound* William Aiken,1990

Respect for Nature: A Theory of Environmental Ethics Paul W. Taylor,2011-05-01 What rational justification is there for conceiving of all living things as possessing inherent worth In Respect for Nature Paul Taylor draws on biology moral philosophy and environmental science to defend a biocentric environmental ethic in which all life has value Without making claims for the moral rights of plants and animals he offers a reasoned alternative to the prevailing anthropocentric view that the natural environment and its wildlife are valued only as objects for human use or enjoyment Respect for Nature provides both a full account of the biological conditions for life human or otherwise and a comprehensive view of the complex relationship between human beings and the whole of nature This classic book remains a valuable resource for philosophers biologists and environmentalists alike along with all those who care about the future of life on Earth A new foreword by Dale Jamieson looks at how the original 1986 edition of Respect for Nature has shaped the study of environmental ethics and shows why the work remains relevant to debates today **The Environment and Christian Ethics** Michael S.

Northcott,1996-09-28 This book is about the extent origins and causes of the environmental crisis Dr Northcott argues that Christianity has lost the biblical awareness of the interconnectedness of all life He shows how Christian theologians and believers might recover a more ecologically friendly belief system and life style The author provides an important corrective to secular approaches to environmental ethics including utilitarian individualism animal rights theories and deep ecology

The Death of Our Planet's Species Martin Gorke,2013-02-22 The present rate and extent of species extinction estimated by some scientists as one species every 20 minutes are unprecedented in the history of mankind Human activities are responsible for nearly all species loss yet ethical aspects of this crisis are rarely mentioned Any concern expressed tends to be over potentially valuable resources information for scientists or compounds that could be used in new medicines that are lost when a species disappears In The Death of Our Planet's Species Martin Gorke argues that such a utilitarian perspective is not only shortsighted but morally bankrupt Holding doctoral degrees in both ecology and philosophy Gorke is uniquely qualified to examine the extinction crisis from both scientific and philosophical perspectives He offers a wide ranging review of the literature on the subject drawing together those two lines of reasoning that are almost always pursued separately After

critical examination of the current state of relevant ecological knowledge Gorke presents a carefully considered case for attributing intrinsic value to all of nature including all species At the heart of his argument is an analysis of the concept of morality According to this analysis the universal character of morality does not permit us to establish limits of moral considerability More precisely every act of exclusion from the moral community is an arbitrary act and is not compatible with a moral point of view The Death of Our Planet s Species sets forth a sound and original argument about the philosophical and ethical dimensions of species conservation Throughout the author combines a high level of theoretical sophistication with clear and straightforward writing Orignially published in German this Island Press edition makes The Death of Our Planet s Species available for the first time to English speaking experts and lay readers *Nature and Life* Munir Hossain Talukder,2018-07 This volume explores some recent thoughts and trends in environmental philosophy and applied ethics The topics selected here are contemporary and offered in academic programs across the globe This book is an essential reference work for those who are keen to conduct detailed research within the fields of environmental philosophy environmental humanities culture public health applied ethics bioethics and political philosophy as well as the general reader interested in the ethical and philosophical issues that are transforming and touching our lives The book uniquely focuses both western and non western approaches *Doing Environmental Ethics* Robert Traer,2019-09-09 Doing Environmental Ethics explains how our way of life has caused the environmental crisis and the ethical choices we have to mitigate the devastating effects of climate change and global warming *Redeeming Creation* Fred Van Dyke,1993-06-01 *An Ethics of Biodiversity* Kevin J. O'Brien,2010 This work argues that these facts should inspire careful reflection and action in Christian churches which must learn from Earth s vast diversity in order to help conserve the natural and social diversity of our planet
