managed to pursue successful education reforms at scale By examining these experiences the report provides both diagnoses and detailed recommendations for improvement not only for education systems within East Asia and Pacific but also for countries across the globe In East Asia and Pacific the impressive record of success in education in some low and middle income countries is proof of concept that schooling in resource constrained contexts can lead to learning for all This report identifies the policies and practices necessary to ensure that students learn and suggests how countries can improve learning outcomes

When China Rules the World Martin Jacques, 2009 For over two hundred years we have lived in a western made world one where the very notion of being modern was synonymous with being western This original and ground breaking new book argues that the twenty first century will be different With the rise of increasingly powerful non Western countries the west will no longer be dominant and there will be many ways of being modern In this new era of contested modernity the central player will be China Far from becoming a western style society China will remain highly distinctive Continental in size and mentality and accounting for one fifth of humanity China is a

civilization state whose characteristics attitudes and values long predate its existence as a nation state China is already having a far reaching and much discussed economic impact but its influence will be far greater than this China's rise signals the end of the global dominance of the western nation state and the rise of a world which it will shape in a host of different ways As it rapidly reassumes its traditional position at the centre of East Asia the old tributary system will be resurface in a modern form contemporary ideas of racial hierarchy will be redrawn and China's ages old sense of superiority will reassert itself China's rise will change the world as we know it from one made in the west to one increasingly shaped by China This profound and far sighted book explains for the first time the deeper meaning of China's arrival as a global power

China's Global Strategy Jenny Clegg, 2009-03-15 China is fast emerging as a powerful player on the world stage This book takes a closer look at the country's stance on a range of global issues arguing that its multipolar diplomacy offers a concrete strategy to constrain the US pursuit of unipolar primacy Many people assume that China will follow an imperialistic strategy and therefore be in direct conflict with the American empire in a quest for world domination Jenny Clegg shows that China is in fact taking a multilateral approach offering real assistance to developing countries and helping to build the institutions required to run a multipolar world Without glossing over China's own internal difficulties the book argues that its international consensus building strategy could lead to a more peaceful and equitable world This book offers a refreshing perspective on China that will be of great value to those interested in the big political questions of how to tackle war and imperialism globalisation and development as well as to undergraduate students of politics economics and international relations
