Experience With Technology Experience With Technology:

Experience with Technology Ali al-Azzawi, 2013-09-16 With a focus on gaining an empirically derived understanding of the underlying psychological dimensions and processes behind people's experiences with technology this book contributes to the debate of user experience UX within several disciplines including HCI design and marketing It analyses UX dynamics at various time scales and explores the very nature of time and meaning in the context of UX Experience with Technology uses personal construct theory PCT as a theoretical and methodological starting point to this project Major case studies are described that examine people's experiences with mobile media devices The results show a group of super ordinate constructs that upon interaction undergo a change in the way they vary and relate to each other as well as the development of a high reliability UX Scale The book concludes by proposing the ICE Interaction Construction and Evaluation model of UX that consolidates its findings into a workable framework of UX The proposed framework will be of particular use to designers and practitioners and forms an empirically grounded starting point for further research

Emotions in Technology

Design: From Experience to Ethics Rebekah Rousi, Jaana Leikas, Pertti Saariluoma, 2020-09-29 Understanding emotions is becoming ever more valuable in design both in terms of what people prefer as well as in relation to how they behave in relation to it Approaches to conceptualising emotions in technology design how emotions can be operationalised and how they can be measured are paramount to ascertaining the core principles of design Emotions in Technology Design From Experience to Ethics provides a multi dimensional approach to studying designing and comprehending emotions in design It presents emotions as understood through basic human technology research applied design practice culture and aesthetics ethical approaches to emotional design and ethics as a cultural framework for emotions in design experience Core elements running through the book are cognitive science cognitive affective theories of emotions i e Appraisal culture the ways in which our minds are trained to recognise respond to and influence design and ethics a deep cultural framework of interpretations of good versus evil This ethical understanding brings culture and cognition together to form genuine emotional experience This book is essential reading for designers technology developers HCI and cognitive science scholars educators and students at both undergraduate and graduate levels in terms of emotional design methods and tools systematic measurement of emotion in design experience cultural theory underpinning how emotions operate in the production and interaction of design and how ethics influence basic primal and higher level emotional reactions The broader scope equips design practitioners developers and scholars with that something more in terms of understanding how emotional experience of technology can be positioned in relation to cultural discourse and ethics
