Excel Data Analysis Modeling And Simulation:

Excel Data Analysis Hector Guerrero, 2018-12-14 This book offers a comprehensive and readable introduction to modern business and data analytics. It is based on the use of Excel, a tool that virtually all students and professionals have access to. The explanations are focused on understanding the techniques and their proper application and are supplemented by a wealth of in chapter and end of chapter exercises. In addition to the general statistical methods, the book also includes Monte Carlo simulation and optimization. The second edition has been thoroughly revised; new topics, exercises, and examples have been added, and the readability has been further improved. The book is primarily intended for students in business, economics, and government, as well as professionals who need a more rigorous introduction to business and data analytics yet also need to learn the topic quickly and without overly academic explanations. *Data Analysis, Optimization, and Simulation*

Teegavarapu, Chandramouli V. Chandramouli, 2021-07-27. Dynamic Simulation and Virtual Reality in Hydrology and Water Resources Management focuses on the understanding, use, and application of system dynamics simulation and virtual reality approaches for modeling the spatial and temporal behavior of natural and managed hydro environmental systems. The book discusses concepts of systems thinking and system dynamics approach and it furthers understanding of the dynamic behavior of natural and engineering systems using feedbacks and dynamic simulation. Numerous examples of models built using different system dynamics simulation modeling environments are provided. It also introduces concepts related to computer animation and virtual reality based immersive modeling. Applications of systems dynamics simulation with animation and virtual reality approaches for modeling and management of hydro environmental systems are illustrated through case studies. This text is ideal for water resources professionals, graduate students, hydrologic modelers, and engineers who are interested in systems thinking, dynamic simulation, and virtual reality modeling approaches.

It will serve as a valuable reference for engineering professionals who model manage and operate hydrosystems Engineering educators will find the book immensely useful to enhance the learning experiences of students Dr Ramesh S V Teegavarapu is a professor at Florida Atlantic University with expertise in modeling water resources and environmental systems hydroinformatics and climate change Dr Chandramouli V Chandramouli is a professor at Purdue University Northwest His expertise is in water resources and environmental modeling integrating artificial intelligence techniques
