Zoology continues to offer students an introductory general zoology text that is manageable in size and adaptable to a variety of course formats. It is a principles-oriented text written for the non-majors or the combined course presented at the freshman and sophomore level. Zoology is organized into three parts. Part One covers the common life processes including cell and tissue structure and function, the genetic basis of evolution, and the evolutionary and ecological principles that unify all life. Part Two is the survey of protists and animals, emphasizing evolutionary and ecological relationships and aspects of animal organization that unite major animal phyla and animal adaptations. Part Three covers animal form and function using a comparative approach. This approach includes descriptions and full-color artwork that depict evolutionary changes in the structure and function of selected organ systems. *Medical and Health Care Books and Serials in Print*, 1997 *Exercise Physiology* Scott Kline Powers, Edward T. Howley, 2001. Complements the PowerPoint presentation that accompanies the text. This workbook includes the PowerPoint slides used in class. It contains lines printed next to each slide which allow students to take notes on the PowerPoint presentation as the instructor lectures. It helps students use PowerPoint images and their own notes to prepare for exams.
