Experiments in General Chemistry Steven L. Murov, 2004 EXPERIMENTS IN GENERAL CHEMISTRY Fourth Edition has been designed to stimulate curiosity and insight and to clearly connect lecture and laboratory concepts and techniques To accomplish this goal an extensive effort has been made to develop experiments that maximize a discovery oriented approach and minimize personal hazards and ecological impact Like earlier editions the use of chromates barium lead mercury and nickel salts has been avoided The absence of these hazardous substances should minimize disposal problems and costs This lab manual focuses not only on what happens during chemical reactions but also helps students understand why chemical reactions occur The sequence of experiments has been refined to follow topics covered in most general chemistry textbooks In addition Murov has included a correlation chart that links the experiments in the manual to the corresponding chapter topics in several Brooks Cole general chemistry titles Each experiment framed by pre and post laboratory exercises and concluding thought provoking questions helps to enhance students conceptual understanding **Laboratory Experiments** for General Chemistry H.
