Locher, 2015-11-13 This collection combines research from the field of im politeness studies with research on language pedagogy and language learning It aims to engender a useful dialogue between im politeness theorists language teachers and SLA researchers and also to broaden the enquiry to naturalistic contexts other than L2 acquisition classrooms by formulating teaching and learning as processes of socialization cultural transmission and adaptation **Change of Paradigms - New Paradoxes** Jocelyne Daems, Eline Zenner, Kris Heylen, Dirk Speelman, Hubert Cuyckens, 2015-10-16 In Paradigm and Paradox Dirk Geeraerts formulated many of the basic tenets that were to form what Cognitive Linguistics is today Change of Paradigms New Paradoxes links back to this seminal work exploring which of the original theories and ideas still stand strong which new questions have arisen and which ensuing new paradoxes need to be

Constructing Families of Constructions Francisco José Ruiz de Mendoza Ibáñez, Alba Luzondo Oyón, Paula Pérez Sobrino, 2017-07-26 Within Construction Grammar this volume moves away from a compartmentalized view of constructions with the aim of providing a more holistic description of grammar Thus the book brings together analyses that look at constructional families within the construction of such languages as English Spanish German Polish Croatian and Hungarian Part 1 focuses on how different analytical perspectives may be applied to comparable and or connected constructions with a view to enhancing our understanding of their similarities differences and relations Part 2 contributes to the state of the art in Construction Grammar in three ways i by reconciling aspects of various constructionist analyses ii by determining to what extent competing constructionist perspectives can offer more adequate approaches to specific analytical needs and iii by challenging central assumptions within Construction Grammar This book is expected to encourage further research into the anatomy of constructional families and their interrelations in all domains of constructional organization

Congresso,2009 *The Pragmatic Turn in Law* Janet Giltrow, Dieter Stein, 2017-06-12 In legal interpretation where does meaning come from Law is made from language yet law unlike other language related disciplines has not so far experienced its pragmatic turn towards inference and the construction of meaning This book investigates to what extent a pragmatically based view of linguistic and legal interpretation can lead to new theoretical views for law and in addition to practical consequences in legal decision making With its traditional emphasis on the letter of the law and the immutable stability of a text as legal foundation law has been slow to take the pragmatic perspective namely the language user s experience and activity in making meaning More accustomed to literal than to pragmatic notions of meaning that is in the text rather than constructed by speakers and hearers the disciplines of law may be culturally resistant to the pragmatic turn By bringing together the different but complementary perspectives of pragmatists and lawyers this book addresses the issue of to what extent legal meaning can be productively analysed as deriving from resources beyond the text beyond the letter of the law This collection revisits the feasibility of the notion of literal meaning for legal interpretation and at the same time the feasibility of pragmatic meaning for law Can explications of pragmatic meaning support court actions in the same way concepts of literal meaning have traditionally supported statutory interpretations and court judgements What are the consequences of a user based view of language for the law in both its practices of interpretation and its definition of itself as a field Readers will find in this collection means of approaching such questions and promising routes for inquiry into the genre and field specific characteristics of inference in law In many respects the problem of literal vs pragmatic meaning confined to the text vs

reaching beyond it will appear to parallel the dichotomy in law between textualism and intentionalism There are indeed illuminating connections between the pair of linguistic terms and the more publicly controversial legal ones But the parallel is not exact and the linguistic dichotomy is in any case anterior to the legal one Even as linguistic pragmatic investigation may serve legal domains the legal questions themselves point back to central conditions of all linguistic meaning Why Language? Jacques Moeschler, 2021-08-23 There is at present no book introducing the general issue of why language is specific to human beings how it works why language is not communication and communication is not language why languages vary and how they evolved Based on the most recent works in linguistics and pragmatics Why Language addresses many questions that everyone has about language Starting from false claims about language and languages showing that language is not communication and communication is not language the first part Language and Communication ends by proposing a difference between linguistic rules and communicative principles The second part Language Society Discourse includes domains of language and language uses which are generally taken as extrinsic to language such as language variety discourse and non ordinary literary usages Special attention is given to figures of discourse metaphor metonymy irony and literary usages such as narration and free indirect style The reader either specialist or amateur in language science will find a first and unique synthesis about what we know today about language and what we have yet to learn sketching what could be the future of linguistics in the next decades
