Powell, 1975 **DRAIN-2DX** Graham Harcourt Powell, 1993 Local/global Approach to Nonlinear Simulation of Compliant Marine Structures Robert Felice Zueck, 1997 This report presents reliable techniques for modeling extremely compliant structures The research focuses on severe geometric nonlinearities associated with very large displacements and rotations The solution requires two major modeling improvements formulation of well conditioned finite elements and development of specific control strategies for nonlinear step by step solution Inherent in the physics of the structure natural events condition the new finite elements Associated event control directs the numerical solution to adhere closely to the true nonlinear structural response path The numerical strategies are a simple extension of the trapezoidal rule for time integration and Newton iteration for nonlinear step by step solution The result is extremely fast efficient and stable nonlinear structural simulation A high level of computational robustness is essential for development of fully nonlinear substructured models A local global approach allows each substructure to have its own specialized local submodel and its own associated local solution strategy A global model then integrates all the super element representations of each diverse submodel The local global framework allows the nonlinear solution strategies to efficiently concentrate computational power where and when needed among the submodels Code development and test problems focus primarily on compliant marine structures where the need for robust highly nonlinear simulation is so great *Structural Control of Buildings Response Using Shape-memory Alloys* ,1995 The Seismic Design Handbook Farzad Naeim, 2012-12-06 This handbook contains up to date existing structures computer applications and information on planning analysis and design seismic design of wood structures A new and very useful feature of this edition of earthquake resistant building structures Its intention is to provide engineers architects is the inclusion of a companion CD ROM disc developers and students of structural containing the complete digital version of the handbook itself and the following very engineering and architecture with authoritative yet practical design information It represents important publications an attempt to bridge the persisting gap between UBC IBC 1997 2000 Structural advances in the theories and concepts of Comparisons and Cross References ICBO earthquake resistant design and their 2000 implementation in seismic design practice 2 NEHRP Guidelines for the Seismic The distinguished panel of contributors is Rehabilitation of Buildings FEMA 273 Federal Emergency Management Agency composed of 22 experts from
