

## Performance Task

### Dream Job Salary Performance Task

**Instructions:** This task is to encourage you to show your mathematical thinking so please be sure to show your work and read the situation carefully. Relax. Be creative. Good Luck.

This is an imaginary story where mathematics is needed to understand the events.

**Situation:** You are offered a 30-day trial period at your dream job. However, the owner of the company is a little unusual so the pay options are non-traditional. They offer you two different pay options for the 30 days.

Option 1: PhP 1,000 a day

Option 2: On your first day of work, you get PhP1. On your second day of work, you get PhP 4. On your third day of work, you get PhP 9. On your fourth day of work, you get PhP 16. It continues this way for 30 days and then once you've completed the 30 days you receive a completion bonus of PhP 15,000.

1.) Decide which payment option you would like to take (which earns you the most money?). In supporting your decision you must use at least two representations (tables, graphs, and/or equations) for each option and explain your decision. (Remember that this is about total pay after 30 days.)
