

# UbD: Stages of Backward Design

Stage 1. Identify desired results.

## Guiding Questions

- What are the established goals?
- What "big ideas" do we want students to come to understand?
- What essential questions will stimulate inquiry?
- What knowledge and skills need to be acquired given the understandings and related content standards? What focus questions will guide students to targeted knowledge and skills?

Stage 2. Determine acceptable evidence.

## Guiding Questions

- What is sufficient and telling evidence of understanding?
- Keeping the goals in mind, what performance tasks should anchor and focus the unit?
- What criteria will be used to assess the work?
- Will the assessment reveal and distinguish those who really understand versus those who only seem to understand?

3. Plan learning experiences and instruction.

## Guiding Questions

- What instructional strategies and learning activities are needed to achieve the results identified in Stage 1 and reflected in the assessment evidence specified in Stage 2?

## First Year English Ubd Teaching Guide:

**School Mathematics Curricula** Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience.

*Competency-Based Teacher Education for English as a Foreign Language* Amber Yayin Wang, 2021-11-25 Providing a series of chapters written by teacher educators in three continents, this edited volume explores the concepts, challenges, possibilities and implementations of competency-based instruction for developing English competencies in English as a foreign language (EFL) contexts. Recent trends in education have emphasized the need to develop competencies that connect learning with real-life performances. This need has brought about a massive increase in the number of studies and scholarly works devoted to research into competency-based education. However, for teachers and learners of EFL, it is challenging to develop competencies for using a language that does not seem to connect with their real-life scenarios. The chapters apply the concept of competency-based instruction in different EFL contexts and are structured around three themes: Theory, current thoughts on theories of competency-based education; Research, empirical research on competency-based teacher education; Practice, integrating competency-based instruction into teacher education. This book offers examples of competency-based EFL teacher education through both research and practical applications. In addition to the innovation in competency approaches, the inclusion of language learning in virtual environments offers a valuable resource for scholars, educators, researchers and all those concerned with current and future education.

*Cases on Research-Based Teaching Methods in Science Education* de Silva, Eugene, 2014-08-31 While the great scientists of the past recognized a need for a multidisciplinary approach, today's schools often treat math and science as subjects separate from the rest. This not only creates a disinterest among students but also a potential learning gap once students reach college and then graduate into the workforce. *Cases on Research-Based Teaching Methods in Science Education* addresses the problems currently facing science education in the USA and the UK and suggests a new hands-on approach to learning. This book is an essential reference source for policymakers, academicians, researchers, educators, curricula developers and teachers as they strive to improve education at the elementary, secondary and collegiate levels.

STEM Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science, Technology, Engineering and Mathematics curricula at all educational levels.

Provided by publisher **International Handbook of Jewish Education** Helena Miller, Lisa D. Grant, Alex Pomson, 2011-04-02 The International Handbook of Jewish Education a two volume publication brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields world wide Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century The Handbook is divided broadly into four main sections Vision and Practice focusing on issues of philosophy identity and planning the big issues of Jewish Education Teaching and Learning focusing on areas of curriculum and engagement Applications focusing on the ways that Jewish Education is transmitted in particular contexts both formal and informal for children and adults Geographical focusing on historical demographic social and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations This comprehensive collection of articles providing high quality content constitutes a definitive statement on the state of Jewish Education world wide as well as through a wide variety of lenses and contexts It is written in a style that is accessible to a global community of academics and professionals **BEPI** ,1979 **Linguistics and Language Behavior Abstracts** ,2007-04
