Fitting The Mind To The World Fitting The Mind To The World:

A Telic Theory of Trust J. Adam Carter, 2024 A Telic Theory of Trust approaches trust as a kind of aimed performance capable of not only success but also of competence and aptness J Adam Carter shows how this illuminate the nature of trust the difference between good and bad trusting and practices of cooperation in general **The Understanding of Causation and the Production of Action** Peter Anthony White, 2018-10-24 This text is an attempt to trace out a line of development in the understanding of how things happen from origins in infancy to mature forms in adulthood There are two distinct but related ways in which people understand things as happening denoted by the terms causation and action This book is concerned with both The central claim and organizing principle of the book is that by the end of the second year of life children have differentiated two core theories of how things happen These theories deal with causation and action The two theories have a common point of origin in the infant s experience of producing actions but thereafter diverge both in content and in realm of application Once established the core theories of causation and action never change but form a permanent metaphysical underpinning on which subsequent developments in the understanding of how things happen are erected The story of development is therefore largely the story of how further concepts become attached to integrated with the core theories Although the developmental and adult literatures on causal understanding appear at first glance to have little in common in fact this appearance is illusory and the idea of two theories helps to bring the two literatures in contact with each other The book begins with a survey of the main philosophical ideas about causation and action Following this the possible origins of understanding in infancy are reviewed and separate chapters then deal with the development of understanding of action and causation through childhood This is then linked to the adult understanding of action and causation and the literature on adult causal attribution and causal judgement is reviewed from this perspective Communication Against Domination Max Hänska, 2021-04-13 This book tackles the philosophical challenge of bridging the gap between empirical research into communication and information technology and normative questions of justice and how we ought to communicate with each other It brings the question of what justice demands of communication to the center of social science research Max H nska undertakes expansive philosophical analysis to locate the proper place of normativity in social science research a looming subject in light of the sweeping roles of information technologies in our social world today The book s first section examines metatheoretical issues to provide a framework for normative analysis while the second applies this framework to three technological epochs broadcast communication the Internet and networked communications and the increasing integration of artificial intelligence and machine learning technologies into our communication systems H nska goes beyond the prevailing frameworks in the field by exploring how we answer normative questions and how our answer can change depending on our social context and the affordances of prevailing communications technologies This book provides an essential guide for scholars as well as graduate and advanced undergraduate students of research and theory in

communication philosophy political science and the social sciences Emotion, Cognition, and the Virtue of Flexibility
 Isabel Kaeslin, 2023-10-04 Should emotions play a role in our decisions even if they are just feelings and not necessarily imbued with reason or cognitively penetrated The author shows that such basic feelings as aversion and attraction can be important normative guides by disrupting engrained habits and beliefs enabling us to reconsider our ways which is important due to the ever changing nature of ethical demands on us Therefore these feelings should guide our decisions even if they are not cognitive This book fills a gap in the philosophy of emotions ethics and virtue epistemology *Force, Content and the Unity of the Proposition* Gabriele M. Mras, Michael Schmitz, 2021-12-30 This volume advances discussion between critics and defenders of the force content distinction and opens up new ways of thinking about force and speech acts in relation to the unity problem The force content dichotomy has shaped the philosophy of language and mind since the time of Frege and Russell Isn't it obvious that for example the clauses of a conditional are not asserted and must therefore be propositions and propositions the forceless contents of forceful acts But others have recently asked in response how can a proposition be a truth value bearer if it is not unified through the forceful act of a subject that takes a position regarding how things are Can we not instead think of propositions as being inherently forceful but of force as being cancelled in certain contexts And what do assertoric but also directive and interrogative force indicators mean Force Content and the Unity of the Proposition will be of interest to researchers working in philosophy of language philosophical logic philosophy of mind and linguistics
