

ADJUSTMENTS

Figure 30
Adjusting Drive Chains

When the baler is removed from storage, rotate the flywheel by hand to make certain that the clutch discs have not adhered, then burnish and adjust the clutch as follows:

1. Adjust the three square head screws (1), Figure 31, until there is a slight drag on the clutch with it still slipping.
2. Connect the baler P.T.O. shaft to the tractor and drive the baler clutch a few revolutions with it slipping. Stop the P.T.O. as soon as the clutch is burnished (brown and polished). Do not burn or blacken the surface.
3. Stop the tractor engine, disengage the P.T.O. and loosen the three clutch square head screws. Secure the screws in the out position with the locking nuts.
4. Adjust the clutch by tightening the six elastic stop lock nuts (2), Figure 31, until the gauge washers are contacted. Back the nuts off until the gauge washers can be turned by hand.
