Enlightenment Aberrations Error And Revolution In France:

Enlightenment Aberrations David W. Bates, 2018-09-05 In *Enlightenment Aberrations* David W. Bates shows that error was a complex important and by no means entirely negative concept in Enlightenment thought one that had a decisive influence in revolutionary debates on political identity and national history What can it mean to write a history of error In Bates's view all philosophy insofar as its project is the search for truth begins in error If truth is posited as a goal to be attained not as a given of some kind then error assumes a central role in the quest for truth Going beyond both liberal celebrations and postmodern critiques of Enlightenment reason Bates reveals just how crucial the problematic relation between human wandering and the mystery of truth was in eighteenth century thought The author draws on a wide range of Enlightenment thinkers including Etienne Bonnot de Condillac Jean d'Alembert Marie Jean Antoine Nicolas Caritat Marquis de Condorcet Jean Jacques Rousseau and Charles Bonnet showing how they wrestled with the risk and promise of error He then demonstrates how the concept of error and its dialectical relationship to truth played out in the political culture of the French Revolution particularly in the Terror In the final chapters Bates looks at the post revolutionary transformations of the Enlightenment discourse of error and its subsequent history in modern European thought

The Necessity of Errors John Roberts, 2020-05-05 Truth and error are interdependent claims to truth can be made only in the light of previous error In *The Necessity of Errors* John Roberts explores how up to Hegel emphasis was placed on error as something that dissolves truth and needs to be eradicated Drawing on the fragmented corpus of writing on error from Locke to Luxemburg Adorno to Vaneigem and covering five key areas from philosophy to political praxis this wide ranging account explores how we learn from error under what conditions and with what means Errors Roberts finds are productive but not in any uniform sense or under all circumstances a theory of errors needs a dialectics of error

The A to Z of the French Revolution Paul R. Hanson, 2007-02-23 The French Revolution remains the most examined event and period in world history Most historians would argue that it was the first modern revolution an event so momentous that it changed the very meaning of the word revolution to its current connotation of a political and or social upheaval that marks a decisive break with the past moving the society in a forward or progressive direction No revolution has occurred since 1789 without making reference to this first revolution and most have been measured against it When revolution shook the foundations of the Old Regime in France shock waves reverberated throughout the western world *The A to Z of the French Revolution* examines the causes and origins the roles of significant persons crucial events and turning points important institutions and organizations and the economic social and intellectual factors involved in the event that gave birth to the Declaration of the Rights of Man and Citizen the introduction of universal manhood suffrage and the Napoleonic Empire An introductory essay chronology and comprehensive bibliography complement the more than 400 cross referenced dictionary entries making this a great resource for students and history enthusiasts alike

Historical Dictionary of the French Revolution Paul R. Hanson, 2015-01-15 The

French Revolution remains the most examined event or period in world history. It was most historians would argue the first modern revolution an event so momentous that it changed the very meaning of the word revolution from restoration as in the Glorious Revolution of 1688 in England to its modern sense of connoting a political and or social upheaval that marks a decisive break with the past one that moves a society in a forward or progressive direction. No revolution has occurred since 1789 without making reference to this first revolution and most have been measured against it. One cannot utter the date 1789 without thinking of revolution and so significant were the changes unleashed in that year that it has come to mark the dividing line between early modern and late modern European history. Kings This second edition of Historical Dictionary of the French Revolution covers its history through a chronology an introductory essay and an extensive bibliography. The dictionary section has over 400 cross referenced entries on the causes and origins the roles of significant persons crucial events and turning points important institutions and organizations and the economic social and intellectual factors involved in the event that gave birth to the Declaration of the Rights of Man and Citizen. This book is an excellent access point for students researchers and anyone wanting to know more about this period.

The German "Mittelweg" Michael G. Lee, 2007 In the 1790s a close knit group of German philosophers published several garden theory texts. These works are unique in that a close knit group of philosophers had never before and has not since produced so many works on the topic of garden design. In essence this cohort sought to imbue the most visionary concepts that had been inherited from the German garden tradition with the intellectual resources that were newly available through Kant's critical philosophy. The most important of these concepts was the prescription for a new Mittelweg or middle path garden that would mediate between the perceived excesses of French formalism and the English picturesque. In close analysis the author demonstrates that Kant used similar middle path techniques in the design of his own critical path between dogmatism and skepticism. This similarity is most apparent when he uses topographical metaphors to describe the organizational principles of his system. By interpreting Kant's topographical metaphors in relation to contemporary garden theories this book offers new insights into the structural similarities between his critical path and the German garden's middle path between French formalism and the English picturesque.
