Enseñanza de la Psicología en programas de pregrado en Colombia

La enseñanza de la psicología en programas de pregrado en Colombia Sonia Carrillo, Karen Ripoll, 2024-03-01 El objetivo principal de la exhaustiva investigación que recogen estas páginas es ofrecer una descripción comparativa de las características de la enseñanza de diversas asignaturas de Psicología en el país. En particular se seleccionaron asignaturas en tres áreas de formación específicas que corresponden a las propuestas en el Modelo Bogotá para la formación de psicólogos a nivel de pregrado: formación básica investigativa y profesional. Un equipo de psicólogos expertos en las respectivas áreas de enseñanza lidera los procesos de recolección y análisis de la información y son estos mismos expertos quienes escribieron los capítulos que componen el libro. Otro objetivo no menos relevante es que los hallazgos de la investigación motiven a los lectores a reflexionar sobre el quehacer docente en su especialidad y a plantearse preguntas de investigación sobre cómo mejorar la calidad de la formación en Psicología en Colombia y quizás también en la región latinoamericana. Hace un llamado a los directores de departamentos y decanos de facultades de Psicología a promover un diálogo en sus instituciones educativas sobre la importancia de una enseñanza de la Psicología que conduzca a establecer y consolidar una cultura que reconozca y estimule la importancia de la investigación sobre docencia en sus contextos educativos. **Enseñar Salud**, 2009-09-01 La

imagen de un país pródigo exento de conflictos raciales y capaz de recrearse en torno al mestizaje es parte de los rasgos de identidad de la nación. Un país resultante de conflictos entre pueblos originarios y colonizadores pero también rehecho en función de los flujos migratorios voluntarios y obligados. La Enseñanza Médica en la Atención Ambulatoria Warren Rubenstein M.D., Yves Talbot M.D., 2018-09-25 Los autores de este texto tienen treinta y cinco años de experiencia docente en este campo y este libro refleja la profundidad de dicha experiencia. Los autores han presenciado y estudiado la expansión de la literatura en este campo y la han sintetizado en este texto. La contribución directa que los autores presentan es la distinción de las teorías de educación que son de aplicación práctica de aquellas que no lo son en el campo de la educación ambulatoria. En este texto ellos presentan también un listado de referencias claves en el campo de la educación médica. **Lecciones de**
