Enterprise Architecture Creating Value By Informed Governance The Enterprise Engineering Series:

Enterprise Architecture Martin Op't Land, Erik Proper, Maarten Waage, Jeroen Cloo, Claudia Steghuis, 2008-12-03 This book is positioned as a first in a series of books on enterprise architecture needed for a Master of Enterprise Architecture program and is targeted both at university students and practitioners with a drive to increase their understanding of these fields. As an introductory book, this book aims to explore the concept of enterprise architecture. At first glance, writing such an introductory book might seem as a straight forward task of setting up a structure and filling in the blanks. However, writing this book turned out to be a pleasant journey of discovery. Based on our past experiences, each of us had a clear understanding of enterprise architecture based on several years of experience and insight in the field. However, when we started writing this book and each of us exposed our individual understandings, it became apparent that our understanding of the field differed in several ways. This prompted several discussions leading to an abundance of new insights. Without exception, these discussions took place in a pleasant and open atmosphere fueled by your shared drive for understanding and increased insight. We are now even more convinced than before that the field of enterprise architecture is a true multi-disciplinary profession. In the resulting book, we would like to share our insights while also hoping to continue our discussions, now also involving you as a reader. We also realise that the journey is still far from complete. While this introductory book provides an overview of the field of enterprise architecture from the perspective of our insights, many aspects need further refinement. Masterclass

Enterprise Architecture Management Jürgen Jung, Bardo Fraunholz, 2021-09-06 This textbook provides a hands-on introduction to enterprise architecture management. It guides the reader through the applications of methods and tools to typical business problems by presenting enterprise architecture frameworks and by sharing experiences from industry. The structure of the book represents the typical stages of the journey of an enterprise architect. Chapter 1 addresses the central question of what to achieve with the introduction of an enterprise architecture. Chapter 2 then introduces concepts and visualizations for business architecture that help with understanding the business. In chapter 3, the development of an application architecture is outlined, which provides transparency on information systems and their business context. Next, chapter 4 presents visual tools to analyze, improve, and eventually optimize the application landscape. Chapter 5 discusses both traditional organizational as well as collaborative approaches to enterprise architecture management. Eventually, several established enterprise architecture frameworks like TOGAF, Zachmann, ArchiMate, and IAF are described in chapter 6. The book concludes with a summary and an outlook on future research potential in chapter 7. Based on their experiences through several years of teaching, the authors introduce students step by step to enterprise architecture development and management. Their book is intended as a guide for master classes at universities and includes lots of exercises and references for further reading. **ECEG2011-Proceedings of the 11th European Conference on E-Government** Maja Klun, Mitja Decman, Tina Jukić, 2011-01-01 **The Practice of Enterprise Modeling** Ulrich Frank, Oscar Pastor, Pericles

Loucopoulos,Ilias Petrounias,2014-11-07 This volume constitutes the proceedings of the 7th IFIP WG 8.1 Conference on the Practice of Enterprise Modeling held in November 2014 in Manchester UK The focus of the PoEM conference series is on advances in the practice of enterprise modeling through a forum for sharing knowledge and experiences between the academic community and practitioners from industry and the public sector The 16 full and four short papers accepted were carefully reviewed and selected from 39 submissions They reflect different topics of enterprise modeling including business process modeling enterprise architecture investigation of enterprise modeling methods requirements engineering and specific aspects of enterprise modeling **Digital Enterprises** Henderik A. Proper,Bas van Gils,Kazem Haki,2023-11-14

This book explores different aspects of and provides concrete suggestions to meet the three main challenges for becoming a Digital Enterprise the transition to the digital age the emergence of service ecosystems and the growing role of data as a key underlying resource As a result of these intertwined and mutually amplifying trends today's enterprises are confronted with several challenges that profoundly impact their design from the definitions of products and services offered to their clients via the business processes that deliver these products and services to the underlying IT infrastructure The contributions which are written by leading enterprise architecture researchers and managers of large corporations cover four key aspects which form each one part of the book Part I presents experiences how different enterprises currently already need to embrace and exploit new challenges like blockchain customer centric services or value co creation networks Part II looks at the need for a new design logic i.e. the need for new ways of thinking regarding the design of enterprises Part III is concerned with the coordination needed among different stakeholders of the ensuing continuous transformations Part IV eventually reflects on the ongoing consequences for enterprise modeling as used to capture both the current affairs of an enterprise as well as design study its possible future affairs The target audience of this book are both master and PhD level students who want to gain insights into key aspects of the challenges confronting digital enterprises as well as enterprise architects and information managers working in enterprises that are on their way to become digital *Practice-Driven*

Research on Enterprise Transformation Frank Harmsen,Knut Grahlmann,Erik Proper,2011-09-25 This volume constitutes the proceedings of the Third Working Conference on Practice Driven Research on Enterprise Transformation PRET held in Luxembourg on September 6 2010 as the industrial track of the 13th IEEE Conference on Commerce and Enterprise Computing CEC 2011 The third edition of PRET marks a close collaboration between academia and practice With the specific purpose of mutual learning and crossfertilization top practitioners from industry were invited to submit case studies To give them enough space for presentation only four academic papers were accepted These papers were submitted with a length of 25 pages to enable a more detailed coverage of the related research and to stimulate further discussions during the conference The topics covered are Enterprise Architecture Business and IT Alignment and Business Process Management and Evaluation **Enterprise Information Systems** Slimane Hammoudi,José Cordeiro,Leszek A. Maciaszek,Joaquim

Filipe,2014-07-24 This book contains substantially extended and revised versions of the best papers from the 15th International Conference on Enterprise Information Systems ICEIS 2013 held in Angers France in July 2013 The 29 full and two invited papers included in this volume were carefully reviewed and selected from 321 submissions They reflect state of the art research focusing mainly on real world applications and highlight the benefits of information systems and technology for industry and services thus connecting academia with the world of real enterprises The topics covered are databases and information systems integration artificial intelligence and decision support systems information systems analysis and specification software agents and Internet computing human computer interaction and enterprise architecture

Practice-Driven Research on Enterprise Transformation Erik Proper,Khaled Gaaloul,Frank Harmsen,Stanisław Wrycza,2012-06-23 This volume constitutes the proceedings of the 4th Working Conference on Practice Driven Research on Enterprise Transformation PRET held in Gdańsk Poland on June 27 2012 as the industrial track of the 24th International Conference on Advanced Information Systems Engineering CAiSE 2012 Restructuring divesting improving performance and merging are among the usual transformation activities that enterprises conduct to provide answers to the challenging demands put on them To foster the much needed debate between researchers and practitioners on these topics the number of papers accepted for PRET is kept low providing the authors and the audience with ample time to engage in discussions about both the practical implications of results and the theoretical underpinnings of phenomena observed in industrial practice This year five papers were selected after careful review and each paper is between 20 and 25 pages long to allow for the presentation of details The topics covered include enterprise architecture business and IT alignment and business process management and evaluation

Enterprise Information Systems Joaquim Filipe,Michał Śmiałek,Alexander Brodsky,Slimane Hammoudi,2020-02-19 This book constitutes extended revised and selected papers from the 21st International Conference on Enterprise Information Systems ICEIS 2019 held in Heraklion Crete Greece in May 2019 The 26 papers presented in this volume were carefully reviewed and selected for inclusion in this book from a total of 205 submissions They deal with topics such as data science and databases ontologies social networks knowledge management software development human computer interaction and multimedia

appear to fail among which those regarding information technology the currently often practiced approaches to strategy development and implementation seem more an obstacle than an enabler for strategic enterprise success Two themes underpin the fundamentally different views outlined in this book First the competence based perspective on governance whereby employees are viewed as the crucial core for effectively addressing the complex dynamic and uncertain enterprise reality as well as for successfully defining and operationalizing strategic choices Second enterprise engineering as the formal conceptual framework and methodology for arranging a unified and integrated enterprise design which is a necessary condition for enterprise success Jan Hoogervorst's presentation which is based on both research and his professional background at Sogeti B V aims at professionals in management and consulting as well as students in management science and business information systems **American Lumberman** ,1916 **Mining Journal** ,1921 **Enterprise**

Governance of Information Technology Steven De Haes,Wim Van Grembergen,Anant Joshi,Tim Huygh,2019-09-03 This book integrates theoretical advances and empirical data on Enterprise Governance in Information Technology EGIT with practical applications based on numerous case examples The third revised edition of Enterprise Governance of Information Technology provides professionals and students with the most recent research advancements as well as an in depth discussion of the recently introduced Control Objectives for Information and Related Technologies COBIT 2019 framework which can be used to facilitate a tailored implementation of effective EGIT Furthermore the book features a new chapter which provides readers with hands on examples from practice and clear insights on how these relate to theory At the forefront of the field the authors of this volume draw from years of research and advising corporate clients to present a comprehensive resource on EGIT Featuring a variety of elements including executive summaries and sidebars extensive references questions and activities and additional online materials this book is a valuable updated resource for professionals students and researchers alike *Controlling the Chaos* Robert Fox, *Controlling the Chaos* uses a deceptively simple functional framework approach that builds upon the groundwork laid down by Zachman NIST Spewack TOGAF COBIT and ITIL to create a vision of IT management that is easy to grasp and implement Using this framework the mind numbing array of functionality that IT manages on behalf of the business is organized into a few simple intuitive lifecycles The framework then paints a clear compelling picture of how to organize both your enterprise architecture and your IT governance efforts for all of these IT functions into a consistent comprehensive program that is easy to understand and manage This framework treats architecture and governance as two sides of the same coin managing your future vision and the roadmap to get there architecture and managing your day to day operations using policies standards processes and roles governance This novel approach combines the holistic view of IT functions with the structures to manage each function's architecture and governance in a holistic program After describing the functional framework concept the text brings life to the structure drawing practical insights from the author's 30 years of architecture and governance experience across several industries

The examples illustrate the difference between managing IT functions in isolation and managing them as part of an integrated enterprise solution frankly admitting where and why architecture and governance programs are failing to provide their promised value The book admits that the root causes of these failures are sometimes found in poor processes but are just as often the result of poor staffing and office politics all of which must be addressed to be successful From a governance standpoint the framework paints a picture of IT governance which brings a clarity and vision that has been sadly lacking in most industry discussions It is an imminently practical approach to building a governance program that allows any IT organization to manage their infrastructure simply and consistently using a mature time tested approach Using this framework will elevate your governance from vaguely defined departmental efforts to a coordinated easily understood easily managed enterprise level program that simplifies the management of IT infrastructure while keeping it focused on supporting the business and returning value From an architectural standpoint the framework squarely faces challenges

Documentation Abstracts ,1985 *Knowledge Sharing in the Integrated Enterprise* Peter Bernus,Mark Fox,2005-09-20

Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability

Enjoying the Melody of Phrase: An Emotional Symphony within **Enterprise Architecture Creating Value By Informed Governance The Enterprise Engineering Series**

In a global eaten by displays and the ceaseless chatter of instantaneous transmission, the melodic beauty and emotional symphony produced by the published word often disappear into the back ground, eclipsed by the relentless sound and disturbances that permeate our lives. Nevertheless, set within the pages of **Enterprise Architecture Creating Value By Informed Governance The Enterprise Engineering Series** an enchanting fictional treasure filled with natural feelings, lies an immersive symphony waiting to be embraced. Crafted by a masterful musician of language, that fascinating masterpiece conducts visitors on a psychological journey, well unraveling the hidden melodies and profound affect resonating within each carefully crafted phrase. Within the depths of the poignant analysis, we can discover the book is central harmonies, analyze their enthralling writing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
