management Journal of Finance and Accounting Research ,2012-07      **Women and the Birth of Russian Capitalism** Irina Mukhina,2014 Little has been known acknowledged or studied about the shuttle trade one of the major manifestations of new Russian life of the 1990s The term itself seems to suggest something of a rather small scale Indeed the amount of each transaction in this trade was miniscule Individual peddlers traveled to near abroad with their bulging bags and brought back home for resale only as many goods as they could personally carry in their enormous suitcases The phenomenon hidden behind the term shuttle trade was by no means insignificant or small in scale By the mid 1990s it constituted the backbone of Russian consumer trade and was a substantial source of revenue The primary participants in the shuttle trade were women and in this enlightening study Mukhina assesses the reasons why women were attracted to this business the range of the personal experiences of female shuttle traders and the social impact of women s involvement in this sort of economic activity By analyzing the social and gendered dimensions of the shuttle trade the reader can begin to understand more broadly how gender shaped the transition period associated with the end of communist regimes in Eastern Europe Moreover the difficulties that these women faced highlight the gap between the rhetoric of free market economy and the actual market practices These women traders had to create and shape the physical market an open air space for their goods without the basic legislative and other provisions of market economies The shuttle trade became an avenue of female suffering but also of survival and even empowerment during the time that most Russians now call the wild 1990s      Ahfad Journal ,2007
