## **Environmental Apocalypse In Science And Art:**

**Environmental Apocalypse in Science and Art** Sergio Fava, 2013 At a time when it is clear that climate change adaptation and mitigation are failing this book examines how our assumptions about valid and usable knowledge are preventing effective climate action Through a cross disciplinary empirically based analysis of climate science and policy the book situates the failures of climate policy in the cultural history of prediction and its interfaces with policy Fava calls into question the current interfaces between scientific research and climate policy by tracing multiple connections between modelling epistemology politics food security religion art and the apocalyptic Demonstrating how the current domination of climate policy by models and scenarios is part of the problem the book examines how artistic practices are a critical location to ask questions differently rethink environmental futures and activate social change The analysis starts with another moment of climatic change in recent western history the overlap of the Little Ice Age and the scientific revolution during which intense climatic scientific and political change were contemporary with mathematical calculation of the apocalypse Dealing with the need for complex answers to complex and urgent questions this is essential reading for those interested in climate action interdisciplinary research and methodological innovation The empirical analyses amount to a methodological experiment across history of science theology art theory and history architecture future studies climatology computer modelling and agricultural policy This book is a major contribution to understanding how we are precluding effective climate action and designing futures that resemble our worst nightmares

**The Anthropocene in Global Media** Leslie Sklair, 2020-11-22 This book offers the first systematic study of how the Anthropocene is reported in mass media globally drawing parallels between the use or misuse of the term and the media's attitude towards the associated issues of climate change and global warming Identifying the potential dangers of the Anthropocene provides a useful path into a variety of issues that are often ignored misrepresented or sidelined by the media These dangers are widely discussed in the social sciences environmental humanities and creative arts and this book includes chapters on how the contributions of these disciplines are reported by the media Our results suggest that the natural science and mass media establishments and the business and political interests which underpin them tend to lean towards optimistic reassurance the good Anthropocene rather than pessimistic alarmist stories in reporting the Anthropocene In this volume contributors explore how dangerous this neutralizing of the Anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity The book presents results from media in more than 100 countries in all major languages across the globe It covers the reporting of key environmental issues such as the impact of climate change and global warming on oceans forests soil biodiversity and the biosphere We offer explanations for differences and similarities in how the media report the Anthropocene in different regions of the world In doing so the book argues that though it is still controversial the idea of the Anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological and Coronavirus crises The

Anthropocene in Global Media will be of interest to students and scholars of environmental studies media and communication studies and the environmental humanities and all those who are concerned about the survival of humans on planet Earth

**Art and Creativity in an Era of Ecocide** Anna Pigott, Owain Jones, Ben Parry, 2023-09-21 What can creativity achieve in an era of ecocide How are people using creative and artistic practices to engage with and resist the destruction of life on earth What are the relationships between creativity and repair in the face of escalating global environmental crises Across twelve compelling case studies this book charts the emergence of diverse forms of artistic practice and brings together accounts of how artists scholars and activists are creatively responding to environmental destruction Highlighting alternative approaches to creativity in both conventional art settings and daily life the book demonstrates the major influence that ecological thought has had on contemporary creative practices These are often more concerned with subtle processes of feeling experience and embodiment than they are with charismatic eco art works In doing so this exploratory book develops a conception of creativity as an anti ecocide endeavour and provides timely theoretical and practical insights on art in an age of environmental destruction

**A Song to Save the Salish Sea** Mark Pedelty, 2016-10-03 On the coast of Washington and British Columbia sit the misty forests and towering mountains of Cascadia With archipelagos surrounding its shores and tidal surges of the Salish Sea trundling through the interior this bioregion has long attracted loggers fishing fleets and land developers each generation seeking successively harder to reach resources as old growth stands salmon stocks and other natural endowments are depleted Alongside encroaching developers and industrialists is the presence of a rich environmental movement that has historically built community through musical activism From the Wobblies Little Red Songbook 1909 to Woody Guthrie's Columbia River Songs 1941 on through to the Raging Grannies formation in 1987 Cascadia's ecology has inspired legions of songwriters and musicians to advocate for preservation through music In this book Mark Pedelty explores Cascadia's vibrant eco musical community in order to understand how environmentalist music imagines and perhaps even creates a more sustainable conception of place Highlighting the music and environmental work of such various groups as Dana Lyons the Raging Grannies Idle No More Towers and Trees and Irthlingz among others Pedelty examines the divergent strategies musical organizational and technological used by each musical group to reach different audiences and to mobilize action He concludes with a discussion of applied ecomusicology considering ways this book might be of use to activists and musicians at the community level

**The Nature State** Wilko Hardenberg, 2017-07-14 Following the industrial revolution and post war exponential increase in human population and consumption conservation in myriad forms has been one particularly visible way in which the government and its agencies have tried to control manage or produce nature for reasons other than raw exploitation Using an interdisciplinary approach and including case studies from across the globe this edited collection brings together geographers sociologists anthropologists and historians in order to examine the degree to which socio political regimes facilitate and shape the emergence and development of nature states

**Battle**

**for the Museum** Rachel Spence,2024-05-30 Culture and power have been bedfellows since ancient times But now more than ever exhibits and the organisations responsible for them have become part of our troubled politics Protests force out problematic patrons and curators and pressure museums to abandon fossil fuel sponsorship Campaigners demand equality and diversity and condemn exploitation of artists and staff alike Those confronting racism and imperial legacies call for restitution of cultural objects Arts journalist Rachel Spence has watched these institutions become a flashpoint for today s social divisions She interviews those on the frontlines from artists and activists to directors and donors revealing stories of elitism inequality and injustice Business and finance launder their reputations through art fair and museum patronage while governments bolster their authority by weaponising or attacking the arts and ordinary museumgoers mobilise to demand better How did we get here and what lies ahead for these institutions From China and Russia to Helsinki and New York from the British Museum and the Louvre to the Guggenheim in Abu Dhabi Battle for the Museum uncovers a dark nexus of capital culture and power and a radical shift in attitudes driven by resistance movements fighting fiercely for exhibition spaces that serve today s public

*Broadening Horizon* Matthew Wilhelm Kapell,2025-02-27 Increasingly digital games center their narratives during or after the apocalypse In 2017 the action role playing game Horizon Zero Dawn offered a new take on society after the end of the world Horizon has since become a multimedia franchise with a second video game released in 2022 in addition to comic books a board game and other adaptations in development This collection analyzes the Horizon franchise and its presentation of the apocalypse ecology gender history and more Game story and game mechanics are fundamental to each essay and contributors offer a close reading or close playing of the games from perspectives as diverse as hauntology postcolonialism contemporary feminism and historiography This first collection on the Horizon franchise argues that we now live in an Apocalyptic period in the same way previous periods were known as Romantic Modernist or Realist Periods and makes the case that Horizon belongs at the crest of this new Apocalyptic Period and at the center of contemporary gaming and of game studies
