Eric Miller, Murray E. Fowler, 2011-07-11 With coverage of current issues and emerging trends Fowler's Zoo and Wild Animal Medicine Volume 7 provides a comprehensive all new reference for the management of zoo and wildlife diseases A Current Therapy format emphasizes the latest advances in the field including nutrition diagnosis and treatment protocols Cutting edge coverage includes topics such as the One Medicine concept laparoscopic surgery in elephants and rhinoceros amphibian viral diseases and advanced water quality evaluation for zoos Editors R Eric Miller and Murray E Fowler promote a philosophy of animal conservation bridging the gap between captive and free ranging wild animal medicine with chapters contributed by more than 100 international experts The Current Therapy format focuses on emerging trends treatment protocols and diagnostic updates new to the field providing timely information on the latest advances in zoo and wild animal medicine Content ranges from drug treatment nutrition husbandry surgery and imaging to behavioral training Coverage of species ranges from giraffes elephants lions and orangutans to sea turtles hellbenders bats kakapos and more An extensive list of contributors includes recognized authors from around the world offering expert information with chapters focusing on the latest research and clinical management of captive and free ranging wild animals A philosophy of animal conservation helps zoo and wildlife veterinarians fulfill not only the technical aspects of veterinary medicine but contribute to the overall biological teams needed to rescue many threatened and endangered species from extinction All content is new with coverage including coverage of cutting edge issues such as white nose disease in bats updates on Ebola virus in wild great apes and chytrid fungus in amphibians Full color photographs depict external clinical signs for more accurate clinical recognition Discussions of the One Medicine concept include chapters addressing the interface between wildlife livestock human and ecosystem health New sections cover Edentates Marsupials Carnivores Perissodactyla and Camelids Over 100 new tables provide a quick reference to a wide range of topics An emphasis on conserving threatened and endangered species globally involves 102 expert authors representing 12 different countries **Emerging Infectious Diseases**, 2007 **Mutualism** Judith L. Bronstein, 2015 The first synthetic conceptual overview of mutualism in more than 25 years edited by the leading figure in the field identifying the ecological and evolutionary features that unite and divide mutualisms and placing them in

clear relation to other pairwise interspecific interactions Canadian Journal of Zoology, 2014-05 **Official Meeting Program** Ecological Society of America. Meeting, 2008 **The Ecology and Epidemiology of Hendra Virus in Flying Foxes** Raina Katy Plowright, 2007 *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.), 2007 **Biodiversity Change and Human Health** Osvaldo E. Sala, Laura A. Meyerson, Camille Parmesan, 2009-01-26 Biodiversity Change and Human Health brings together leading experts from the natural science and social science realms as well as the medical community to explore the explicit linkages between human driven alterations of biodiversity and documented impacts of those changes on human health The book utilizes multidisciplinary approaches to explore and address the complex interplay between natural biodiversity and human health and well being The five parts examine health trade offs between competing uses of biodiversity highlighting synergistic situations in which conservation of natural biodiversity actually promotes human health and well being relationships between biodiversity and quality of life that have developed over ecological and evolutionary time the effects of changing biodiversity on provisioning of ecosystem services and how they have affected human health the role of biodiversity in the spread of infectious disease native biodiversity as a resource for traditional and modern medicine Biodiversity Change and Human Health synthesizes our current understanding and identifies major gaps in knowledge as it places all aspects of biodiversity and health interactions within a common framework Contributors explore potential points of crossover among disciplines both in ways of thinking and of specific methodologies that could ultimately expand opportunities for humans to both live sustainably and enjoy a desirable quality of life **Influence of Spatial Heterogeneity and Vertebrate Species Assemblage on the Ecology and Risk of Lyme Disease in the Far-western United States** Andrea Swee, 2009 **Managing Water Under Uncertainty and Risk** Unesco, 2012 This flagship report is a comprehensive review that gives an overall picture of the world's freshwater resources It analyses pressures from decisions that drive demand for water and affect its availability It offers tools and response options to help leaders in government the private sector and civil society address current and future challenges It suggests ways in which institutions can be reformed and their behaviour modified and explores possible sources of financing for the urgently needed investment in water The WWDR4 is a milestone within the WWDR series reporting directly on regions and highlighting hotspots and it has been mainstreamed for gender equality It introduces a thematic approach Managing Water under Uncertainty and Risk in the context of a world which is changing faster than ever in often unforeseeable ways with increasing uncertainties and risks It highlights that historical experience will no longer be sufficient to approximate the relationship between the quantities of available water and shifting future demands Like the earlier editions the WWDR4 also contains country level case studies describing the progress made in meeting water related objectives The WWDR4 also seeks to show that water has a central role in all aspects of economic development and social welfare and that concerted action via a collective approach of the water using sectors is needed to

ensure water's many benefits are maximized and shared equitably and that water related development goals are achieved

Mammalia, 2008 **Coping with Climate Change** Rosina M. Bierbaum, Daniel G. Brown, Jan L. McAlpine, 2008 *Coping with Climate Change National Summit Proceedings* is a remarkable book for a remarkable time. Its 256 pages capture great thinking and ideas from environmental leaders regarding national adaptation strategies to climate change. The book presents the discussions, papers, and presentations from the historic 2007 National Summit on Coping with Climate Change hosted by the University of Michigan's School of Natural Resources and Environment (SNRE). The book contains keynote speeches, transcripts of breakout sessions and panel discussions, and the candid and valuable insights from sector syntheses and scenario summaries. The companion CD has many of the key PowerPoint presentations as well as photos from the Summit. SNRE organized the May 8-10 event as the University's commitment to the Clinton Global Initiative, a non-partisan effort to devise and implement solutions to world challenges. External Summit sponsorship came from Google Inc., the Gordon and Betty Moore Foundation, the Frey Foundation, the National Science Foundation, and the U.S. Environmental Protection Agency. The nation has lost a decade in thinking seriously about coping with climate change. This Summit was an effort to jump start that conversation with science and policy leaders and put SNRE in the forefront of innovative thinking to confront climate change, said SNRE Dean Rosina M. Bierbaum. **Nature** Sir Norman Lockyer, 2008 Proceedings, 2008 International Conference Embryonic and Somatic Stem Cells - Regenerative Systems for Cell And Tissue Repair Volker Ter Meulen, Anna M. Wobus, 2006 *Proceedings* International Association of Theoretical and Applied Limnology, 2008 **Pathways to Scientific Teaching** Diane Ebert-May, Janet Hodder, 2008 This book is based on a series of Pathways articles that illustrate effective instructional methods to help students gain conceptual understanding in ecology. It presents a philosophy of scientific teaching based on pedagogical principles designed to improve learning. **The American Naturalist**, 2009
