Education And Technology Key Issues And Debates:

Education and Technology Neil Selwyn, 2011-03-17 Digital technology lies at the heart of contemporary education provision. This book considers the key issues in the field and addresses some fundamental but often unvoiced questions about the ever-growing use of technologies in education. It focuses on the social as well as the technical aspects of these issues, giving careful thought to the people, practices, processes and structures behind the use of technologies in education. The book considers a range of current debates and controversies: Will technology replace the school or university? Will technology replace the teacher? What do we really know about learning and technology? Does technology make learning fairer? Can technology address the many educational problems and inequalities faced by people around the world? What does the future hold for technology and education? What can be learnt from the history of technology use? Neil Selwyn takes a critical look at some of the major debates concerning digital technologies and education. Study questions and annotated further reading are included to support readers, along with a companion website linking to online sources and resources.

Education and Technology Neil Selwyn, 2021-11-18 What does the future hold for digital technology and education? What can be learnt from the history of technology use in education? Does digital technology make education more individualized? Will it eventually replace the school, university and teacher? In a thoroughly revised edition of this successful book, Neil Selwyn takes a critical look at some of the major current debates and controversies concerning digital technologies and education. Focusing on the social as well as the technical aspects of these issues, Selwyn addresses fundamental but often unvoiced questions about education and technology. Over the course of eight chapters, the book gives careful thought to the people, practices, processes and structures behind the rapidly increasing use of technologies in education, with an emphasis on the implications of digital technologies for individuals and institutions. Brand new chapters on trends in AI and big data-driven automation of education and the future of education and technology are included. This edition also features new sections exploring post-digital perspectives, personalized learning, digital labour and the impending need for sustainable forms of digital education. The book focuses attention on the connections between recent technology developments and broader changes in education practice, education policy and education theory over the past few decades. It also challenges us to reflect on future directions and controversies for education in the post-digital age. Expanded study questions, annotated further reading and a new glossary of key terms are included to support readers. An updated companion website links to bonus chapters and audio recordings for further discussion.
