Diversity In Design Perspectives From The Non Western World:

Diversity in Design Vibhavari Jani, 2011-06-23 This text provides lecturers with a resource to teach interior design from an inclusive perspective acknowledging the contributions of all world cultures rather than just western European traditions

The Handbook of Interior Design Jo Ann Asher Thompson, Nancy Blossom, 2015-02-09 The Handbook of Interior Design explores ways of thinking that inform the discipline of interior design. It challenges readers to consider the connections within theory, research, and practice and the critical underpinnings that have shaped interior design. Offers a theory of interior design by moving beyond a descriptive approach to the discipline to a why and how study of interiors. Provides a full overview of the most current Interior Design research and scholarly thought from around the world. Explores examples of research designs and methodological approaches that are applicable to interior design upper division and graduate education courses. Brings together an international team of contributors including well established scholars alongside emerging voices in the field reflecting mature and emergent ideas, research, and philosophies in the field. Exemplifies where interior design sits in its maturation as a discipline and profession through inclusion of diverse authors, topics, and ideas. The Routledge Companion for Architecture Design and Practice Mitra Kanaani, Dak Kopec, 2015-11-06 The Routledge Companion for Architecture Design and Practice provides an overview of established and emerging trends in architecture practice. Contributions of the latest research from international experts examine external forces applied to the practice and discipline of architecture. Each chapter contains up to date and relevant information about select aspects of architecture and the changes this information will have on the future of the profession. The Companion contains thirty five chapters divided into seven parts: Theoretical Stances, Technology, Sustainability, Behaviorism, Urbanism, Professional Practice, and Society. Topics include Evidence Based Design, Performativity, Designing for Net Zero Energy, The Substance of Light in Design, Social Equity, and Ethics for Sustainable Architecture, Universal Design, Design Psychology, Architecture Branding, and the Politics of Identity. The Role of BIM in Green Architecture, Public Health and the Design Process, Affordable Housing, Disaster Preparation and Mitigation, Diversity, and many more. Each chapter follows the running theme of examining external forces applied to the practice and discipline of architecture in order to uncover the evolving theoretical tenets of what constitutes today's architectural profession and the tools that will be required of the future architect. This book considers architecture's interdisciplinary nature and addresses its current and evolving perspectives related to social, economic, environmental, technological, and globalization trends. These challenges are central to the future direction of architecture and as such, this Companion will serve as an invaluable reference for undergraduate and postgraduate students, existing practitioners, and future architects.
