Dispersion of Powders in Liquids G. D. Parfitt, 1969 *Dispersion of Powders in Liquids* James Adair, 2016-10-01

Dispersing Powders in Liquids R.D. Nelson, 2012-12-02 This book provides powder technologists with laboratory procedures for selecting dispersing agents and preparing stable dispersions that can then be used in particle size characterization instruments Its broader goal is to introduce industrial chemists and engineers to the phenomena terminology physical principles and chemical considerations involved in preparing and handling dispersions on a commercial scale The book introduces novices to industrial problems due to improper degree of dispersion the nomenclature used in describing particles the basic physical phenomena equations and chemistry involved in particle interactions the analytical techniques used for evaluating solid liquid interfaces textbooks courses societies and vendors that can provide an advanced understanding of dispersion phenomena The book provides resources for more experienced technologists by discussing characteristics and applications of the various chemical classes of surfactants providing procedures for selecting and optimizing a dispersant for a specific solid liquid system and end use constraints naming typical commercial surfactants and listing the addresses and telephone numbers of their manufacturers illustrating the many physical and chemical equilibria that must be considered in modelling a dispersion and guiding the reader to the sources of both data and advanced theoretical treatments required to implement such models The author has for several years been a consultant in the field of slurry technology obtaining information materials equipment and expert advice required to solve slurry problems He also teaches slurry technology and powder dispersion courses to students who are either engineers recently graduated from college or managers recently transferred to plants that handle slurries His expertise gives the book a wide appeal as virtually every manufacturing process involves dispersions of powders in liquids it is of interest to chemists and chemical engineers in industry the concise definitions descriptions and examples make it an ideal reference text for teachers and students

Karsa,P.J. Donnelly,J.M. Goode,2012-12-06 Existing surfactants directories tend to focus on product identification by tradename producer or chemical type enabling the user only to identify product equivalents and surfactant suppliers Application information where available is usually scant or given as a footnote This new directory approaches the identification of surfactants primarily from the applications standpoint Hence the formulator or end user can readily assess the products available for use in a particular industry sector and select materials giving the required surface active properties For example a formulator of agrochemicals for crop protection can turn to the section which refers to surfactants for use in the agrochemical industry and then easily identify a wetter dispersant system for the production of water dispersible granules Information is presented in an alternative format in the second part of the directory which will help the user to identify swiftly products for a particular application by surface active properties It is difficult if not impossible to identify an industry which does not directly or indirectly utilise surfactants Therefore it has proved necessary to simplify industry classifications to encompass a variety of uses under broader sector titles The industry classifications adopted here have been used in many previous publications and papers and define as accurately as possible the major industries and applications serviced by the surfactant industry The editors have been particularly pleased with the support and response of the industry in the supply of data Chemistry and Industry ,1970 **Official Gazette of the United States Patent and Trademark Office** United States.
