QlikView   Trends with Actual Figures : Mini Charts

CURRENCY ▾ EUR

Graphs show more than numbers, but numbers show the exact actual figures. With Minicharts, there is no need to pick one or the other. Minicharts takes tables to the next level.

There are various modes for minicharts. Use Line to show the movements, bars to show the quantitative values and whiskers to show the win/loss values. Using mini charts, because tables do not display only actual figures but individual historical measurements, users can make appropriate decisions. Pick the most appropriate minichart mode for the right measurements.

If showing the movements is important, use the line mode. You will be able to see the patterns of each dimension value and compare if one is different from the others. It is often used to show the exchange rates over multi-currencies. In the line mode, y-axis should not be shared by dimension, and "force zero based scaling" should not be enabled.

When showing quantitative values, it is important to show the actual values. Therefore, it is common to share y-axis by dimension and "force zero based scaling" should be enabled.

Whisker is a unique measurement, either Win or Loss, Yes or No, or in other words, 1 or 0. Therefore, it is most applicable for analysis such as budget achieved or not, baseball games win or loss etc.
