Meridians of Salt Paul N. Eubanks, Ashley A. Dumas, Heather McKillop, Marius Alexianu, 2025-09-26 This book explores the relationship between salt sodium chloride and the development of human societies from a cross cultural and global perspective Although it is not possible to discuss the importance of salt to all ancient and modern societies the geographically and temporally diverse examples highlighted here are used to examine a series of related topics critical to understanding the economic political social and religious impacts of salt through space and time These topics include among others the techniques used to produce salt the individuals responsible for its production its cultural uses and applications its role in cross cultural exchange and the impact of its circumscribed distribution on settlement patterns and developing complexity In exploring these topics the chapter authors rely on archaeological data to craft their interpretations however as salt itself is largely invisible in the archaeological record other avenues of investigation such as ethnoarchaeology ethnohistory and experimental archaeology are necessary to gain a more complete understanding of this mineral s influence on the development of human cultures Each chapter includes a summary of seminal research within a particular geographic region along with a discussion of recent or on going projects from that area This volume is intended for a professional audience but university students and graduates and readers with an interest in anthropology archaeology ethnoarchaeology or history will find the chapters comprehensible and informative

Rethinking the Andes-Amazonia Divide Adrian J.

Pearce, David G. Beresford-Jones, Paul Heggarty, 2020-10-21 Nowhere on Earth is there an ecological transformation so swift and so extreme as between the snow line of the high Andes and the tropical rainforest of Amazonia The different disciplines that research the human past in South America have long tended to treat these two great subzones of the continent as self contained enough to be taken independently of each other Objections have repeatedly been raised however to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia when there are also clear indications of significant connections and transitions between them Rethinking the Andes Amazonia Divide brings together archaeologists linguists geneticists anthropologists ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia from deepest prehistory up to the European colonial period The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness discussion and co operation across the divides between disciplines Underway since 2008 this programme has already yielded major publications on the Andean past including History and Language in the Andes 2011 and Archaeology and Language in the Andes 2012

New Perspectives on the Origins of Americanist Archaeology David L. Browman, Stephen Williams, 2002-02-19 In this landmark book experienced scholars take a retrospective look at the developing routes that have brought American archaeologists into the 21st century In 1996 the Society for American Archaeology s Committee on the History of Archaeology established a biennial symposium named after Gordon R. Willey one of the fathers of American archaeology to focus on the history of the discipline This volume grew out of the second symposium presented at the 1998 meeting of the Society for American Archaeology Interest in the intellectual history of the field is certainly nothing new the first such volume appeared in 1856 but previously focus has been on individuals and their theories and methods or on various government agencies that supported developed or mandated

excavations in North America This volume however focuses on the roots of Americanist archaeology including its pre 1915 European connections and on some of the earliest work by women archaeologists which has been largely overlooked Full of valuable insights for archaeologists and anthropologists both professional and amateur into the history and development of Americanist archaeology New Perspectives will also inspire and serve as a model for future research David Browman is Professor of Anthropology and Chair of the Interdisciplinary Program in Archaeology at Washington University Stephen Williams is Professor Emeritus of Anthropology at Harvard University Forgotten Places and Things Society for Historical Archaeology. Annual Meeting, 1983 **Voices in American Archaeology** Wendy Ashmore, Dorothy T. Lippert, Barbara J. Mills, 2010-05-01 Archaeological ideas and practices have experienced transformative change since the Society for American Archaeology's fiftieth Anniversary Authors in this volume from the SAA press consider critically some of today's most noteworthy issues Their voices like their views are as diverse as the discipline Nonetheless they repeatedly recognize deep articulation between archaeology and social economic and political milieus from local to global scales And they share conviction that much is to be done in the years ahead This volume aims to rouse more voices to join the lively ongoing conversation **Historical Archaeology and the Study of American Culture** Lu Ann De Cunzio, Bernard L. Herman, 1996 In this volume of essays historical archaeologists and scholars from a variety of other fields explore creative approaches to material culture as a form of cultural expression The essays derived from papers first presented at the 1991 Winterthur Conference emphasize material culture's communicative qualities its roles in social performance the construction of identity and the mediation of interaction and its interpretive limitations A special concern with contexts in their myriad forms resonates throughout the volume The contributors not only describe time and place but they seek the intimate social and symbolic details of human agency in all their diversity The essays reveal how dynamic archaeological thinking can appeal to a broader audience The first section Construction of Context Negotiating Consumer Culture groups six essays that foreground people and their choices in diverse consumer contexts The authors examine the ways that material culture illuminates the cultural dialogues between New England's native peoples and European traders urbane Virginians and their country cousins Southern slaves and their owners agrarian potters and industrial capitalists and nineteenth century Americans and the brokers of consumer culture In the second section In the Active Voice Remaking the American Landscape the attention shifts from people to the land they inhabited and changed Through close reading of multiple data sources at many scales from microscopic pollen grains to urban plans the authors of these four essays trace the remaking of eighteenth and nineteenth century American farms and cities In the third section Working toward Meaning The Scope of Historical Archaeology the authors work outward from the preceding studies directly engaging the reader in the process of reinventing historical archaeology Together with the other contributions to this volume these three concluding essays demonstrate the important place of historical archaeology in the interdisciplinary arena of material culture studies **Contributions to American**
