Equitable Resource Allocation Models Algorithms And Applications:

Equitable Resource Allocation Hanan Luss, 2012-09-11 A unique book that specifically addresses equitable resource allocation problems with applications in communication networks manufacturing emergency services and more Resource allocation problems focus on assigning limited resources in an economically beneficial way among competing activities Solutions to such problems affect people and everyday activities with significant impact on the private and public sectors and on society at large Using diverse application areas as examples Equitable Resource Allocation Models Algorithms and Applications provides readers with great insight into a topic that is not widely known in the field Starting with an overview of the topics covered the book presents a large variety of resource allocation models with special mathematical structures and provides elegant efficient algorithms that compute optimal solutions to these models Authored by one of the leading researchers in the field Equitable Resource Allocation Is the only book that provides a comprehensive exposition of equitable resource allocation problems Presents a collection of resource allocation models with applications in communication networks transportation content distribution manufacturing emergency services and more Exhibits practical algorithms for solving a variety of resource allocation models Uses real world applications and examples to explain important concepts Includes end of chapter exercises Bringing together much of the equitable resource allocation research from the past thirty years this book is a valuable reference for anyone interested in solving diverse optimization problems **Operations**

Research Proceedings 2018 Bernard Fortz, Martine Labbé, 2019-08-29 This book gathers a selection of peer reviewed papers presented at the International Conference on Operations Research OR 2018 which was held at the Free University of Brussels Belgium on September 12 14 2018 and was jointly organized by the German Operations Research Society GOR and the Belgian Operational Research Society ORBEL 575 scientists practitioners and students from mathematics computer science business economics and related fields attended the conference and presented more than 400 papers in parallel topic streams as well as special award sessions The respective papers discuss classical mathematical optimization statistics and simulation techniques These are complemented by computer science methods and by tools for processing data designing and implementing information systems The book also examines recent advances in information technology which allow big data volumes to be processed and enable real time predictive and prescriptive business analytics to drive decisions and actions Lastly it includes problems modeled and treated while taking into account uncertainty risk management behavioral issues etc

Broadband Wireless Multimedia Networks Benny Bing, 2012-12-17 Provides a clear coherent review of all major wireless broadband standards with an emphasis on managing the explosive growth in mobile video 802.11ac and 802.16m 802.22 and LTE Advanced are the emerging broadband wireless standards that offer many powerful wireless features This book gives an accessible overview of the various standards and practical information on 802.11 link adaptation 4G smartphone antenna design wireless video streaming and smart grids Broadband Wireless Multimedia Networks distills the many complex

wireless features in a clean and concise manner so that the reader can understand the key principles Topics covered include adaptive modulation and coding orthogonal frequency division multiple access single carrier frequency division multiple access multiple antenna systems medium access control time and frequency division duplex transmission and the frame formats With wireless operators now carrying a much greater amount of video traffic than data and voice traffic the book also covers adaptive bit rate streaming and bandwidth management for 3D and HD video delivery to multi screen personal devices Featured chapters in the book are Overview of Broadband Wireless Networks IEEE 802 11 Standard IEEE 802 16 Standard Long Term Evolution ATSC Digital TV and IEEE 802 22 Standards Mesh Relay and Interworking Networks Wireless Video Streaming Green Communications in Wireless Home Area Networks Including over 180 chapter end exercises and 200 illustrative figures and accessible recorded tutorials Broadband Wireless Multimedia Networks is ideal for industry professionals and practitioners graduate students and researchers

Vehicle Safety Communications Tao Zhang, Luca Delgrossi, 2012-09-04 Provides an up to date in depth look at the current research design and implementation of cooperative vehicle safety communication protocols and technology Improving traffic safety has been a top concern for transportation agencies around the world and the focus of heavy research and development efforts sponsored by both governments and private industries Cooperative vehicle systems which use sensors and wireless technologies to reduce traffic accidents can play a major role in making the world's roads safer Vehicle Safety Communications Protocols Security and Privacy describes fundamental issues in cooperative vehicle safety and recent advances in technologies for enabling cooperative vehicle safety It gives an overview of traditional vehicle safety issues the evolution of vehicle safety technologies and the need for cooperative systems where vehicles work together to reduce the number of crashes or mitigate damage when crashes become unavoidable Authored by two top industry professionals the book Summarizes the history and current status of 5.9 GHz Dedicated Short Range Communications DSRC technology and standardization discussing key issues in applying DSRC to support cooperative vehicle safety Features an in depth overview of on board equipment OBE and roadside equipment RSE by describing sample designs to illustrate the key issues and potential solutions Takes on security and privacy protection requirements and challenges including how to design privacy preserving digital certificate management systems and how to evict misbehaving vehicles Includes coverage of vehicle to infrastructure V2I communications like intersection collision avoidance applications and vehicle to vehicle V2V communications like extended electronic brake lights and intersection movement assist Vehicle Safety Communications is ideal for anyone working in the areas of or studying cooperative vehicle safety and vehicle communications

Digital Signal Processing for RFID Feng Zheng, Thomas Kaiser, 2016-03-04 This book discusses the fundamentals of RFID and the state of the art research results in signal processing for RFID including MIMO blind source separation anti collision localization covert RFID and chipless RFID Aimed at graduate students as well as academic and professional researchers engineers in RFID technology it enables readers to become conversant with the

latest theory and applications of signal processing for RFID Key Features Provides a systematic and comprehensive insight into the application of modern signal processing techniques for RFID systems Discusses the operating principles channel models of RFID RFID protocols and analog digital filter design for RFID Explores RFID oriented modulation schemes and their performance Highlights research fields such as MIMO for RFID blind signal processing for RFID anti collision of multiple RFID tags localization with RFID covert RFID and chipless RFID Contains tables illustrations and design examples

WiFi, WiMAX, and LTE Multi-hop Mesh Networks Hung-Yu Wei, Jarogniew Rykowski, Sudhir Dixit, 2013-03-05 Wifi WiMAX and Cellular Multihop Networks presents an overview of WiFi based and WiMAX based multihop relay networks As the first text to cover IEEE 802 16j multihop hop relay technology this revolutionary resource explores the latest advances in multi hop and ad hoc networking Not only does this reference provide the technological aspects but also the applications for the emerging technology and architectural issues Ranging from introductory material to advanced topics this guidebook is essential for engineers researchers and students interested in learning more about WiFi and WiMAX multihop relay networks

Fog for 5G and IoT Mung Chiang, Bharath Balasubramanian, Flavio Bonomi, 2017-03-10 The book examines how Fog will change the information technology industry in the next decade Fog distributes the services of computation communication control and storage closer to the edge access and users As a computing and networking architecture Fog enables key applications in wireless 5G the Internet of Things and big data The authors cover the fundamental tradeoffs to major applications of fog The book chapters are designed to motivate a transition from the current cloud architectures to the Fog Chapter 1 and the necessary architectural components to support such a transition Chapters 2 6 The rest of the book Chapters 7 xxx are dedicated to reviewing the various 5G and IoT applications that will benefit from Fog networking This volume is edited by pioneers in Fog and includes contributions by active researchers in the field Covers fog technologies and describes the interaction between fog and cloud Presents a view of fog and IoT encompassing ubiquitous computing that combines the aspects of both industry and academia Discusses the various architectural and design challenges in coordinating the interactions between M2M D2D and fog technologies Fog for 5G and IoT serves as an introduction to the evolving Fog architecture compiling work from different areas that collectively form this paradigm *Computational*
