forty five years because it will help businesses to succeed Some stories are enlightening but not funny because companies their employees and ownership paid the price Due diligenceIgnorance is not bliss excusable or acceptable Discover the truth think beyond the obvious and overcome ignorance with education and training Major project pitfalls are assumptions bias and fixation The leaders who win with ERP perform extraordinary due diligence before selecting the software the leader who loses does incomplete due diligence Therefore superior due diligence leads to victory and poor homework leads to defeat how much worse with no due diligence It is by attention to this activity that one can foresee who is likely to win or lose Paraphrase Sun Tzu The Art of War speaking about planning and calculation Assemble the puzzleERP projects are complex involving strategies internal assessments evaluation of multiple alternatives and making critical business decisions They require assigning high performers to project teams taking them away from important daily activities ERP systems are so expensive that failure is not an option Evidence based decisions and a structured process lead to successful results
