Prevent and Reverse Heart Disease Caldwell B. Esselstyn Jr. M.D., 2007-02-01 Prevent and Reverse Heart Disease challenges conventional cardiology by posing a compelling revolutionary idea that we can in fact abolish the heart disease epidemic in this country by changing our diets Drawing on the groundbreaking results of his twenty year nutritional study Dr Caldwell B Esselstyn Jr a former surgeon researcher and clinician at the Cleveland Clinic convincingly argues that a plant based oil free diet can not only prevent and stop the progression of heart disease but also reverse its effects Furthermore it can eliminate the need for expensive and invasive surgical interventions such as bypass and stents no matter how far the disease has progressed Dr Esselstyn began his research with a group of patients who joined his study after traditional medical procedures to treat their advanced heart disease had failed Within months of following a plant based oil free diet their angina symptoms eased their cholesterol levels dropped significantly and they experienced a marked improvement in blood flow to the heart Twenty years later the majority of Dr Esselstyn's patients continue to follow his program and remain heart attack proof Prevent and Reverse Heart Disease explains the science behind these dramatic results and offers readers the same simple nutrition based plan that has changed the lives of his patients forever In addition Dr Esselstyn provides more than 150 delicious recipes that he and his wife Ann Crile Esselstyn have enjoyed for years and used with their patients Clearly written and backed by irrefutable scientific evidence startling photos of angiograms and inspiring personal stories Prevent and Reverse Heart Disease will empower readers to take charge of their heart health It is a powerful call for a paradigm shift in heart disease therapy
