Fractional Sobolev Inequalities Symmetrization Interpolation:

Fractional Sobolev Inequalities Joaquim Martín, Mario Milman, 2014 The authors obtain new oscillation inequalities in metric spaces in terms of the Peetre K functional and the isoperimetric profile Applications provided include a detailed study of fractional Sobolev inequalities and the Morrey Sobolev embedding theorems in different contexts In particular the authors include a detailed study of Gaussian measures as well as probability measures between Gaussian and exponential They show a kind of reverse Polya Szego principle that allows them to obtain continuity as a self improvement from boundedness using symmetrization inequalities The authors methods also allow for precise estimates of growth envelopes of generalized Sobolev and Besov spaces on metric spaces The authors also consider embeddings into BMO and their connection to Sobolev embeddings Special Functions, Partial Differential Equations, and Harmonic Analysis

Constantine Georgakis, Alexander M. Stokolos, Wilfredo Urbina, 2014-11-07 This volume of papers presented at the conference in honor of Calixto P Calderón by his friends colleagues and students is intended to make the mathematical community aware of his important scholarly and research contributions in contemporary Harmonic Analysis and Mathematical Models applied to Biology and Medicine and to stimulate further research in the future in this area of pure and applied mathematics *Hardy-Littlewood and Ulyanov*

Rupert Frank, Giuseppe Mingione, Lubos Pick, Ovidiu Savin, Jean Van Schaftingen, 2024-11-19 This book is dedicated to exploring optimization problems of geometric analytic nature which are fundamental to tackling various unresolved questions in mathematics and physics These problems revolve around minimizing geometric or analytic quantities often representing physical energies within prescribed collections of sets or functions They serve as catalysts for advancing methodologies in calculus of variations partial differential equations and geometric analysis Furthermore insights from optimal functional geometric inequalities enhance analytical problem solving endeavors The contributions focus on the intricate interplay between these inequalities and problems of differential and variational nature Key topics include functional and geometric inequalities optimal norms sharp constants in Sobolev type inequalities and the regularity of solutions to variational problems Readers will gain a comprehensive understanding of these concepts deepening their appreciation for their relevance in mathematical and physical inquiries **A New Approach to Kazhdan-Lusztig Theory of Type B Via Quantum**

Symmetric Pairs Huanchen Bao, Weiqiang Wang, 2018 We show that Hecke algebra of type B and a coideal subalgebra of the type A quantum group satisfy a double centralizer property generalizing the Schur Jimbo duality in type A The quantum group of type A and its coideal subalgebra form a quantum symmetric pair A new theory of canonical bases arising from

quantum symmetric pairs is initiated It is then applied to formulate and establish for the first time a Kazhdan Lusztig theory for the BGG category $\mathcal{O}$ of the orthosymplectic Lie superalgebras $\mathfrak{osp}(2m+1|2n)$ In particular our approach provides a new formulation of the Kazhdan Lusztig theory for Lie algebras of type B/C **A Torsion Jacquet-Langlands Correspondence** Frank Calegari, Akshay Venkatesh, 2019 We prove a numerical form of a Jacquet Langlands correspondence for torsion classes on arithmetic hyperbolic 3 manifolds *Proved by editor* Around the Research of Vladimir Maz'ya III Ari Laptev, 2009-11-25 This volume reflects the variety of areas where Maz'ya's results are fundamental influential and or pioneering New advantages in such areas are presented by world recognized experts and include in particular Beurling's minimum principle inverse hyperbolic problems degenerate oblique derivative problems the L_p contractivity of the generated semigroups some class of singular integral operators general Cwikel Lieb Rozenblum and Lieb Thirring inequalities domains with rough boundaries integral and supremum operators finite rank Toeplitz operators etc Essays on Fourier Analysis in Honor of Elias M.
