Elizabeth Kolbert On Field Notes From A Catastrophe:

Field Notes from a Catastrophe Elizabeth Kolbert, 2015-02-03 A new edition of the book that launched Elizabeth Kolbert's career as an environmental writer updated with three new chapters making it yet again irreplaceable Boston Globe Elizabeth Kolbert's environmental classic *Field Notes from a Catastrophe* first developed out of a groundbreaking National Magazine Award winning three part series in *The New Yorker* She expanded it into a still concise yet richly researched and damning book about climate change a primer on the greatest challenge facing the world today But in the years since the story has continued to develop the situation has become more dire even as our understanding grows Now Kolbert returns to the defining book of her career She has added a chapter bringing things up to date on the existing text plus three new chapters on ocean acidification the tar sands and a Danish town that's gone carbon neutral making it again a must read for our moment

Field Notes from a Catastrophe Elizabeth Kolbert, 2007-08-20 The world has known about global warming since the late 1970s yet little has been done to halt it The threat if we fail is nothing less than catastrophe the flooding of coastal communities the extinction of species and entry into a climate regime of which humans have no experience Exploring the relationship between what we know and what we refuse to know Elizabeth Kolbert takes us on an urgent journey from the Arctic to Central America interviewing researchers environmentalists and traditional Inuits whose lives have already been dramatically altered by climate change

Field Notes from a Catastrophe Elizabeth Kolbert, 2012-04-12

_____ A superbly crafted diligently compressed vision of a world spiralling towards destruction Observer Kolbert mesmerises with her poetic cadence in this riveting view of the apocalypse already upon us Robert F Kennedy Jr The most frightening book I've read this century *Times Literary Supplement* _____ Elizabeth Kolbert's environmental classic *Field Notes from a Catastrophe* first developed out of a groundbreaking award winning three part series in *The New Yorker* She expanded it into a still concise yet richly researched and damning book about climate change a primer on the greatest challenge facing the world today In the years since the story has continued to develop the situation has become more dire even as our understanding of it grows Now Kolbert returns to the defining book of her career with new chapters on ocean acidification the tar sands and a Danish town that's gone carbon neutral *Field Notes from a Catastrophe* remains as necessary as ever and a must read for our moment

The Decline of Nature Gilbert LaFreniere, Gilbert F. LaFreniere, 2008 An environmental history of ideas embedded in a compact account of Western civilization's ecological impact upon the planet particularly in

Europe and its colonies Climate Change in Popular Culture James Craig Holte, 2022-06-17 An invaluable resource for general readers investigating climate change this book examines the impact of climate change on popular culture and analyzes how writers and directors treat the disasters caused by climate change in their novels and films *Climate Change in Popular Culture A Warming World in the American Imagination* is the first study that includes analyses of both fiction and popular nonfiction works devoted to climate change In addition the book examines a number of classic works from the perspective of the growing field of climate change literature and includes a brief history of climate change science as well basic scientific definitions all intended for general readers The text provides an introduction to the science politics and economics of climate change It also includes both historical overviews and potential probable futures projected by leading climate scientists and environmental writers In addition the text looks at how such creative writers and directors as Margaret Atwood John Steinbeck Paulo Bacigalupi Kim Stanley Robinson T C Boyle Michael Crichton and Octavia Butler among others have used the disasters caused by climate change in their work **The Dawn of Agriculture and the Earliest States in Genesis 1-11** Natan Levy, 2023-11-29 This book invites a close textual encounter with the first 11 chapters of Genesis as an intimate drama of marginalised peoples wrestling with the rise of the world's first grain states in the Mesopotamian alluvium The initial 11 chapters of Genesis are often considered discordant and fragmentary despite being a story of beginnings within the context of the Bible Readers discover how these formative chapters cohere as a cross generational account of peoples grappling with the hegemonic spread of domesticated grain production and the concomitant rise of the pristine states of Mesopotamia The book reveals how key episodes from the Genesis narrative reflect major societal revolutions of the Neolithic period in Mesopotamia through a three fold hermeneutical method literary analysis of the Bible and contemporary cuneiform texts modern scholarship from archaeological anthropological ecological and historical sources and relevant exegesis from the Second Temple and rabbinical era These three strands entwine to recount a generally sequential story of the earliest archaic states as narrated by non elites at the margins of these emerging state spaces *The Dawn of Agriculture and the Earliest States in Genesis 1-11* provides a fascinating reading of the first 11 chapters of Genesis appealing to students and scholars of the Hebrew Bible and the Near East as well as those working on ecological injustice from a religious vantage point Climate Change and Society John Urry, 2011-06-20 This is the first book to develop a proper sociology of climate change and will be an excellent companion to Tony Giddens *The Politics of Climate Change* Eco-Nihilism Wendy Lynne Lee, 2017-02-22 If we were to ask what is the root cause of our current and unprecedented environmental crisis climate change many particularly on the progressive Left would refer to the excesses of capitalism and they'd be right In *Eco Nihilism The Philosophical Geopolitics of the Climate Change Apocalypse* Wendy Lynne Lee demonstrates that there are no versions of conquest capital compatible with the fact of a finite planet and that a logic whose operating premise is growth is destined to not only exhaust our planetary resources but also generate profound social injustice and geopolitical violence in

its pursuit Nonetheless it is clear that the violence and injustice of capital is selective some benefit greatly while others are subjugated to its pathological drive to profit Hence Lee argues that any comprehensive analysis of what Jason Moore has dubbed the Capitalocene must include an equally probing account of human chauvinism that is the axes along which capital is supplied with resources and labor Defined in terms of race sex gender and species these axes come ready made to the advantage of capitalist commodification Without an understanding of how and why humanity will remain doomed to settling for a sustainably unjust world as opposed to realizing a just and desirable one Indeed on our current trajectory we may not even achieve the sustainable The introduction of climate change into the mix of environmental deterioration the ever widening economic gap between global North and global South and the accelerating violence of terrorism civil war and human slavery make of a warming planet a combustible world The only way out requires ending the myth of endless resources a rejection of climate change denial and a radical re valuation of human centeredness not as a locus of power but as an opportunity to take moral and epistemic responsibility for a world whose biotic diversity and ecological integrity make the struggle to realize it worthwhile This solution demands not only an end to capitalism but the deliberate reclamation of value aesthetic moral and civic and a radical transformation of both personal and collective conscience Lee appeals to the experiential aesthetics of John Dewey and the feminist concept of the standpoint of the subjugated She argues for a version of the precautionary principle informed by an environmentally and socially responsible concept of the desirable future as the clearest path away from the precipice

Forest Magazine ,2007 *H Is for Hope* Elizabeth Kolbert,2024-03-26 In twenty six essays one for each letter of the alphabet the Pulitzer Prize winning author of *The Sixth Extinction* takes us on a hauntingly illustrated journey through the history of climate change and the uncertainties of our future Climate change resists narrative and yet some account of what s happening is needed Millions of lives are at stake and upward of a million species And there are decisions to be made even though it s unclear who exactly will make them In *H Is for Hope* Elizabeth Kolbert investigates the landscape of climate change from A for Svante Arrhenius who created the world s first climate model in 1894 to Z for the Colorado River Basin ground zero for climate change in the United States Along the way she looks at Greta Thunburg s blah blah blah speech B learns to fly an all electric plane E experiments with the effects of extreme temperatures on the human body T and struggles with the deep uncertainty of the future of climate change U Adapted from essays originally published in *The New Yorker* and beautifully illustrated by Wesley Allsbrook *H Is for Hope* is simultaneously inspiring alarming and darkly humorous a unique examination of our changing world

Life on a Little-Known Planet Elizabeth Kolbert,2025-11-04 A landmark collection of Pulitzer Prize winner Elizabeth Kolbert s most important pieces about climate change and the natural world To be a well informed citizen of Planet Earth *Rolling Stone* has advised you need to read Elizabeth Kolbert From her National Magazine Award winning series *The Climate of Man* to her Pulitzer Prize winning book *The Sixth Extinction* Kolbert s work has shaped the way we think about the environment in the twenty first century

Collected in *Life on a Little Known Planet* are her most influential and thought provoking essays. An intrepid reporter and a skillful translator of scientific ideas, Kolbert expertly captures the wonders of nature and paints vivid portraits of the researchers and concerned citizens working to preserve them. She takes readers all around the globe from an island in Denmark that's succeeded in going carbon neutral to a community in Florida that voted to give rights to waterways to the Greenland ice sheet which is melting in a way that has implications for everyone. We meet a biologist who believes we can talk to whales, an entomologist racing to find rare caterpillars before they disappear, and a climatologist who's considered the father of global warming amongst other scientists at the forefront of environmental protection. The threats to our planet that Kolbert has devoted so much of her career to exposing have only grown more serious. Now is the time to deepen our understanding of the world we are in danger of losing.

SEJ Journal, 2006 **Esquire**, 2009 Edible Estates Fritz Haeg, Diana Balmori, 2008. The Edible Estates project proposes the replacement of the domestic front lawn with a highly productive edible landscape. It was initiated by architect and artist Fritz Haeg on Independence Day 2005 with the planting of the first regional prototype garden in the geographic center of the United States, Salina, Kansas. Since then, three more prototype gardens have been created in Lakewood, California; Maplewood, New Jersey; and London, England. Edible Estates regional prototype gardens will ultimately be established in nine cities across the United States. *Edible Estates: Attack on the Front Lawn* documents the first four gardens with personal accounts written by the owners, garden plans, and photographs illustrating the creation of the gardens from ripping up the grass to harvesting a wide variety of fruits, vegetables, and herbs. Essays by Haeg, landscape architect Diana Balmori, garden and food writer Rosalind Creasy, author Michael Pollan, and artist and writer Lesley Stern set the Edible Estates project in the context of larger issues concerning the environment, global food production, and the imperative to generate a sense of community in our urban and suburban neighborhoods. This smart, affordable, and well-designed book also includes reports and photographs from the owners of other edible front yards around the country, as well as helpful resources to guide you in making your own Edible Estate.

What We Should Have Known Keith Gessen, 2007. Transcripts of two conversations that took place at the offices of n 1 in New York City. Two groups of smart thirtysomething writers gather in person to talk candidly about books they wish they had and hadn't read as teenagers and as college students.

Shakespeare Wrote for Money Nick Hornby, 2008. The final collection from Nick Hornby's column *Stuff I've Been Reading* in the *Believer* magazine.

Economic Analysis of Law in India Palanichamy Gurusamy Babu, 2010. The editors are grateful to the many people who made this project possible. In this respect, we refer both to the conference in February 2008 at the Central University in Hyderabad, as well as to the publication of the book.

Acknowledgements Freedom from Mid-East Oil Jerry B. Brown, Rinaldo Brutoco, James A. Cusumano, 2007-05 **How to Cool the Planet** Jeff Goodell, 2010. Goodell persuades readers that geoengineering may just be the last best hope, a Plan B for the environment. His compelling tale of scientific hubris and technical daring is sure to jump start the next big debate about

the future of life on Earth
