## **Ellipsis Dual Vision:**

**Ellipses** Alexandra Posen, Colin Cheney, Scott Indrisek, 2015 New York artist Stephen Posen photographs the everyday world with a painter's eye capturing compositions that often blur the lines between realism and abstraction The 174 images compiled in his first book of photographs *Ellipses Dual Visions* represent a broad range of locations and subjects ranging from Tonl Sap Lake in Cambodia to a flea market in rural Pennsylvania a vending machine of rubber balls to a contorted Barbie doll all culled from decades of photographs in Posen's archives The artist has arranged these images taken in very diverse places and disparate times in pairs based on form content or some obscure magnetism leaving the viewer to conjure a bridge between the two The elliptical space between the images like the series of dots that represents an omitted piece of text becomes a third entity pregnant with possibility As art editor Scott Indrisek writes in the introduction to the book 2 distinct photographs are made into strange bedfellows and that's the joy Finding connections where many see only a random chaos of image The photographs collected here are playful poetic and endlessly compelling They demonstrate the mastery and intuition of Posen's eye both as a photographer and an editor teasing elusive connections from the visual glut of the modern world **Ellipse**, 2002 *Baroque New Worlds* Lois Parkinson Zamora, Monika Kaup, 2010-07-13 Traces the

**The Dublin Review** ,1926 **Perception** Howard Robinson,2003-05-20 Questions about perception remain some of the most difficult and insoluble in both epistemology and in the philosophy of mind This controversial but highly accessible introduction to the area explores the philosophical importance of those questions by re examining what had until recent times been the most popular theory of perception the sense datum theory Howard Robinson surveys the history of the arguments for and against the theory from Descartes to Husserl He then shows that the objections to the theory particularly Wittgenstein s attack on privacy and those of the physicalists have been unsuccessful He argues that we should return to the theory sense data in order to understand perception In doing so he seeks to overturn a consensus that has dominated the philosophy of perception for nearly half a century
