Judicial Selection in the States Herbert M. Kritzer, 2020-04-30 Using detailed case studies of the relevant US states Herbert Kritzer provides an unprecedented examination of the process and politics of how states select and retain judges The book is organized around the competing goals of politics and professionalism namely whether the focus in choosing judges should be on future judicial decisions court outputs or on the court processes by which those decisions are reached Or in considering who should be a judge whether the emphasis should be on political credentials or on professional credentials One important

finding is that political concerns have surpassed professionalism concerns since 2000 Another is that voters have been more supportive of professionalism in selecting appellate judges than trial judges Judicial Selection in the States should be read by anyone seeking a deep understanding of the complex interplay between politics and the judiciary at the state level in the United States **Catalog of Federal Domestic Assistance** ,1969 Identifies and describes specific government assistance
