Understanding Models for Learning and Instruction: Dirk Ifenthaler, Pablo Pirnay-Dummer, J. Michael Spector, 2008-02-22
For more than 25 years the pioneering research and theories of Norbert Seel have had a profound impact on educational thought in mathematics. In this special tribute an international panel of researchers present the current state of model based education, its research methodology and technology. Fifteen stimulating, sometimes playful chapters link the multiple ways of constructing knowledge and domains as diverse as cognitive science, computer science and philosophy to the complex real world of skill development. Generalize model based theories into educational settings and explain how to design and evaluate model centered learning environments. Extensive reading lists, provocative graphics and a wealth of cultural touchstones from the Bible to Bob Dylan make *Understanding Models for Learning and Instruction* an accessible yet thought provoking collection. A sampling of the topics covered: Evidence based assessment of learning models, Translating cognitive theory into educational practice, New approaches to tracking mental change over time, Applying psychoeducational theory to the hands on classroom, Using games as a strategy for constructing model centered learning environments, Externalizing mental models with Mindtools. This synthesis of latest innovations and fresh perspectives on classic constructs makes *Understanding Models for Learning and Instruction* cutting edge reading for the researchers and educators in mathematics instruction building the next generation of educational models.

Child L2 Writers Amparo Lázaro-Ibarrola, 2023-01-04
Studies on L2 writing tasks with child learners have broken through several barriers in the past few years. Although long considered a solitary task, writing is now regularly done in collaborative pairs and groups as well. New and more comprehensive writing and feedback strategies have been implemented and task repetition has made its way from oral into writing tasks. Finally, research analyses of linguistic outcomes have been complemented by measures of task motivation. Drawing on knowledge from the fields of psychology, education and SLA, this book includes a comprehensive and interdisciplinary analysis of this body of research. It pinpoints the specificity of writing tasks for child L2 learners, identifies the research gaps that pave the way for future research and offers a guide for teachers who wish to implement writing tasks with young language learners. In sum, this book demonstrates that child L2 writing constitutes a new field of inquiry and attempts to give child L2 writers a room of their own.
