## **Downsizing The State Privatization And The Limits Of Neoliberal Reform In Mexico:**

**Downsizing the State** Dag MacLeod, 2010-11-01 Beginning in 1983 the Mexican government implemented one of the most extensive programs of market oriented reform in the developing world Downsizing the State examines a key element of this reform program the privatization of public firms Drawing upon interviews with government officials business executives and labor leaders as well as data from government archives and corporate documents MacLeod highlights the difficulties of linking market reforms to improved public welfare Privatization failed to live up to its promise of raising living standards or decentralizing the economy Indeed privatization actually increased the concentration of wealth in Mexico while redirecting the economy toward foreign markets These findings contribute to theoretical debates regarding state autonomy and the embeddedness of economic action MacLeod calls into question the autonomy of the Mexican state in its privatization program He shows that the creation of markets where public firms once dominated has involved both the destruction of social relations and the construction of new relations and institutions to regulate the market **Feminists Rethink the**

Rodolfo F. Acuña,2017-05-30 This book uses a micro narrative structure to explore the assault on the collective memory of Mexican Americans in the Southwest United States from 1910 to 1966 These communities survival depends on their histories and identities which are being quickly erased by gentrification and dispersal neoliberalism and privatization This issue is most apparent in the education system where Mexican American students receive inferior educations and lack access to higher education Avoiding the overly theoretical macro narrative this book uses case studies and micro narratives to suggest possible changes and actions to address this issue It also explores how the erasure of Mexican Americans history and identity mirrors society as a whole

**A Brief History of Neoliberalism** David Harvey,2007-01-04 Neoliberalism the doctrine that market exchange is an ethic in itself capable of acting as a guide for all human action has become dominant in both thought and practice throughout much of the world since 1970 or so Its spread has depended upon a reconstitution of state powers such that privatization finance and market processes are emphasized State interventions in the economy are minimized while the obligations of the state to provide for the welfare of its citizens are diminished David Harvey author of The New Imperialism and The Condition of Postmodernity here tells the political economic story of where neoliberalization came from and how it proliferated on the world stage While Thatcher and Reagan are often cited as primary authors of this neoliberal turn Harvey shows how a complex of forces from Chile to China and from New York City to Mexico City have also played their part In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W Bush Finally through critical engagement with this history Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements
