Today we are seeing a new form of blended learning not only is technology enhancing the learning environment but formal and informal learning are combining and there is self and peer assessment of results Open learning cultures are challenging the old and long practiced methods used by educators and transforming learning into a more student driven and independent activity which uses online tools such as blogs wikis or podcasts to connect resources students and teachers in a novel way While in higher education institutions most assessments are still tied to formal learning scenarios teachers are more and more bound to recognize their students informal learning processes and networks This book will help teachers lecturers and students to better understand how open learning landscapes work how to define quality and create assessments in such environments and how to apply these new measures To this end Ehlers first elaborates the technological background for more collaborative distributed informal and self guided learning He covers the rise of social media for learning and shows how an architecture of participation can change learning activities These new paradigms are then applied to learning and education to outline what open learning landscapes look like Here he highlights the shift from knowledge transfer to competence development the increase in lifelong learning and the importance of informal learning user generated content and open educational resources He then shows how to manage quality by presenting a step by step guide to developing customized quality concepts for open learning landscapes Finally several methods dealing with assessment in these new environments are presented including guidelines templates and use cases to exemplify the approaches Overall Ehlers argues for assessment as an integral part of learning processes with quality assurance as a method of stimulating a quality culture and continuous quality development rather than as a simple controlling exercise **"Technology Enhanced Learning in**

**Higher Education (TELE), International Conference On". , E-Learning Practice in Higher Education: A Mixed-Method Comparative Analysis** Sayed Hadi Sadeghi,2017-09-13 This book investigates e learning practices at American and Australian institutes of higher learning their status quo best practice examples and remaining issues Utilizing a mixed methods approach it combines three studies two using quantitative methods and a third using qualitative methods in order to gauge the status quo of e learning The first study addresses the dominant cultural dimensions revealing that the main explanation for the results may be the fact that most suppliers of the Australian university s e learning system had an East Asian cultural background and predominantly traditional perspectives on learning In Study 2 the findings indicate that the levels of e learning practice at the Australian and US universities surveyed were above average although the American

university was ranked higher in terms of e learning practices In turn Study 3 investigates current problems in e learning practice on the basis of four aspects pedagogy culture technology and e practice and determines that cultural sensitivity and effective cultural practices show room for improvement while key technological challenges and issues like faculty polices quality LMS and online support need to be overcome In general the outcomes suggest that it is essential for the Australian university surveyed to further develop and update its e learning system especially in terms of e practice using the same technologies that pioneering countries like America are employing Indeed the combination of adopting patterns successfully used in other countries and adjusting them to the Australian culture represents the best strategy for educational decision and policy makers This book provides the basis for designing a culture sensitive framework for higher education e learning practice in American and Australian contexts Moreover students and teachers experiences with e learning in a comparative higher education context can help higher education instructors and university managers to understand how e learning relates to and can be integrated with other experiences of learning and teaching

Atkins, Douglas Van Houweling, 2002-12-30 Academic management and administrative processes rely heavily on technology in business offices virtual laboratories digital libraries and the like Technology also has an impact upon teaching freeing classrooms from constraints of time and space Yet many university leaders are hesitant to set technology as a priority This book is designed to address the subject from a perspective appropriate to leaders An important concept covered here is that the new advances in information technology drive a significant restructuring of our social institutions which will provide access to knowledge and education that was formerly restricted to the privileged The generation raised with this technology demands new approaches to teaching and learning this poses a unique challenge to traditional faculty members The authors of this book believe It is our collective challenge as scholars educators and academic leaders to develop a strategic framework capable of understanding and shaping the impact that this extraordinary technology will have on our institutions They believe that academic institutions will change in form and character and that such changes will affect the mission function and possibly even the concept of the university The role of leadership is to both see over the horizon and adapt leadership styles to an environment of constant change Leadership must formulate a clear and consistent institutional vision
