Minority Access to Information Technology Harry Pachon, Elsa E. Macias, Paula Y. Bagasao, 2000

Knowledge & Power in the Global Economy David Gabbard, 2008 The second edition of Knowledge and Power in the Global Economy examines how neoliberal and neoconservative policies are working in tandem to privatize and commercialize public schools It looks at how these policies and the agendas behind them have impacted the internal dynamics of school management teaching and learning as well as

how they have transformed the external dynamics of education from a public good or service offered to serve public interests to a private enterprise primarily serving private interests In addition to information critique and analysis multiple perspectives are provided that readers can draw upon to formulate an alternative vision of education as a crucial element of social change along democratic and egalitarian lines The first edition of this volume provided a critical encyclopedic approach to the rhetoric of educational reform as it developed from the 1980s through the 1990s critiquing its vocabulary elaborating the multiplicity of ways that the logic of neoliberalism and the emerging patterns of high stakes testing and accountability were impacting the curriculum and introducing ideas associated with alternative and liberatory educational projects Since its publication in 2000 policy developments such as the No Child Left Behind Act of 2001 in the U S and others in the U K and other parts of the world have nationalized and intensified these patterns deepening the logic and extent of neoliberalism's hold over educational reforms At the same time it is impossible to understand the current crises in education solely in terms of neoliberalism the impact of neoconservatism must also be considered Hence this second edition has a new subtitle *The Effects of School Reform in a Neoliberal Neoconservative Age* This edition is structured around five themes Political and Social Foundations Anti Educational Foundations The Set Up Anti Educational Foundations The Trap Classroom Consequence Democracy's Path This volume will particularly interest scholars and professionals across the fields of educational foundations curriculum theory and educational policy and is well suited as a text for courses in these areas

Media and American Studies in the EFL-Classroom Jürgen Donnerstag, Laurenz Volkmann, 2008 The growing interest in working with media particularly the new digital media in the EFL classroom is reflected in the ten articles of this volume Their focus is specifically on traditional visual media such as films and video clips but also on blogs podcasts digital storytelling hyperfictions Internet projects creating learner software etc As the articles either explicitly or implicitly indicate these new media formats are suitable for integration into current action or task based teaching forms All articles aim to foster nuanced judgments on literature culture and popular media in the US The media discussed here mirror the multiplicity of voices within the US indicating the tremendous variety of cultural

and political positions They undermine lopsided and biased attitudes toward American mass media forcing the learner to discuss critical positions within the US and to modify stereotypical media judgements **Mike Meyers CompTIA A+ Guide to Managing and Troubleshooting PCs, 4th Edition (Exams 220-801 & 220-802)** Mike Meyers, 2012-08-22
